PORTFOLIO · EXPERTISE

Vikneshvar Balasubramanian

Forward Deployed Engineer / Generative AI Engineer · 6+ years

I take enterprise AI from pilot to governed production: production RAG, agentic pipelines and data platforms on AWS.

- AWS Partner: Forward Deployed Engineer – Advanced
- AWS Certified Generative AI Developer – Professional
- Microsoft Azure AI Engineer – Associate
- IBM Data Engineering Certification
- Google Data Analytics Professional Certificate

Gen AI & Agents

AWS Bedrock (Agents, AgentCore, Knowledge Bases, Data Automation), LangChain, LangGraph, CrewAI, MCP

Retrieval & Search

OpenSearch, FAISS, Redis, hybrid search (BM25 + vector, RRF), hierarchical chunking, re-ranking

Data Engineering

Kafka, Databricks, Spark, Airflow, AWS Kinesis, EMR, Lambda, Firehose

Analytics & BI

Power BI, Databricks SQL, semantic models, natural-language-to-SQL, Looker Studio

LLM Optimisation

Prompt caching, context compaction, in-memory retrieval layers, cost and latency tuning

Delivery Model

Forward-deployed: embed with the business, scope, build, ship to production, hand over

A

Knowledge & Search

Turning scattered enterprise knowledge into instant, cited answers.

- Enterprise Knowledge Assistant
- HR & Policy Helpdesk Assistant
- IT Service Desk Assistant
- Executive Initiative Intelligence Agent
- Contract & Legal Document Intelligence
- Market & Competitive Research Agent
- Meeting Intelligence
- Engineering & Codebase Knowledge Assistant
- Multilingual Translation & Localisation

A · KNOWLEDGE & SEARCH

Enterprise Knowledge Assistant

A single, secure chat interface over the company's documents, wikis and tickets. It retrieves the most relevant passages with hybrid search, respects each user's access rights, and answers with citations so employees can trust and verify every response.

INTEGRATES WITH

SharePoint, Confluence, ServiceNow, Google Drive, Box, Bedrock Knowledge Bases, Amazon Quick Suite, Microsoft 365 Copilot, Glean, OpenSearch, Azure AI Search, Entra ID / Okta SSO

VALUE & KPIS

- Time-to-answer
- Citation coverage
- Questions deflected
- Answer accuracy (eval set)
- Weekly active users
- Thumbs-up rate

A · KNOWLEDGE & SEARCH

HR & Policy Helpdesk Assistant

An always-on assistant that answers employee questions on leave, benefits, payroll and policies. It combines policy documents with live HR system data, so answers are personalised to the employee's location, grade and balances, and it escalates to HR when a human is needed.

INTEGRATES WITH

Workday, SAP SuccessFactors, Oracle HCM, UKG, ServiceNow HRSD, Copilot Studio, Microsoft Teams, Slack, SharePoint policy libraries

VALUE & KPIS

- HR ticket deflection
- Employee CSAT
- Policy answer accuracy
- Time to resolution
- Escalation rate
- Cost per HR case

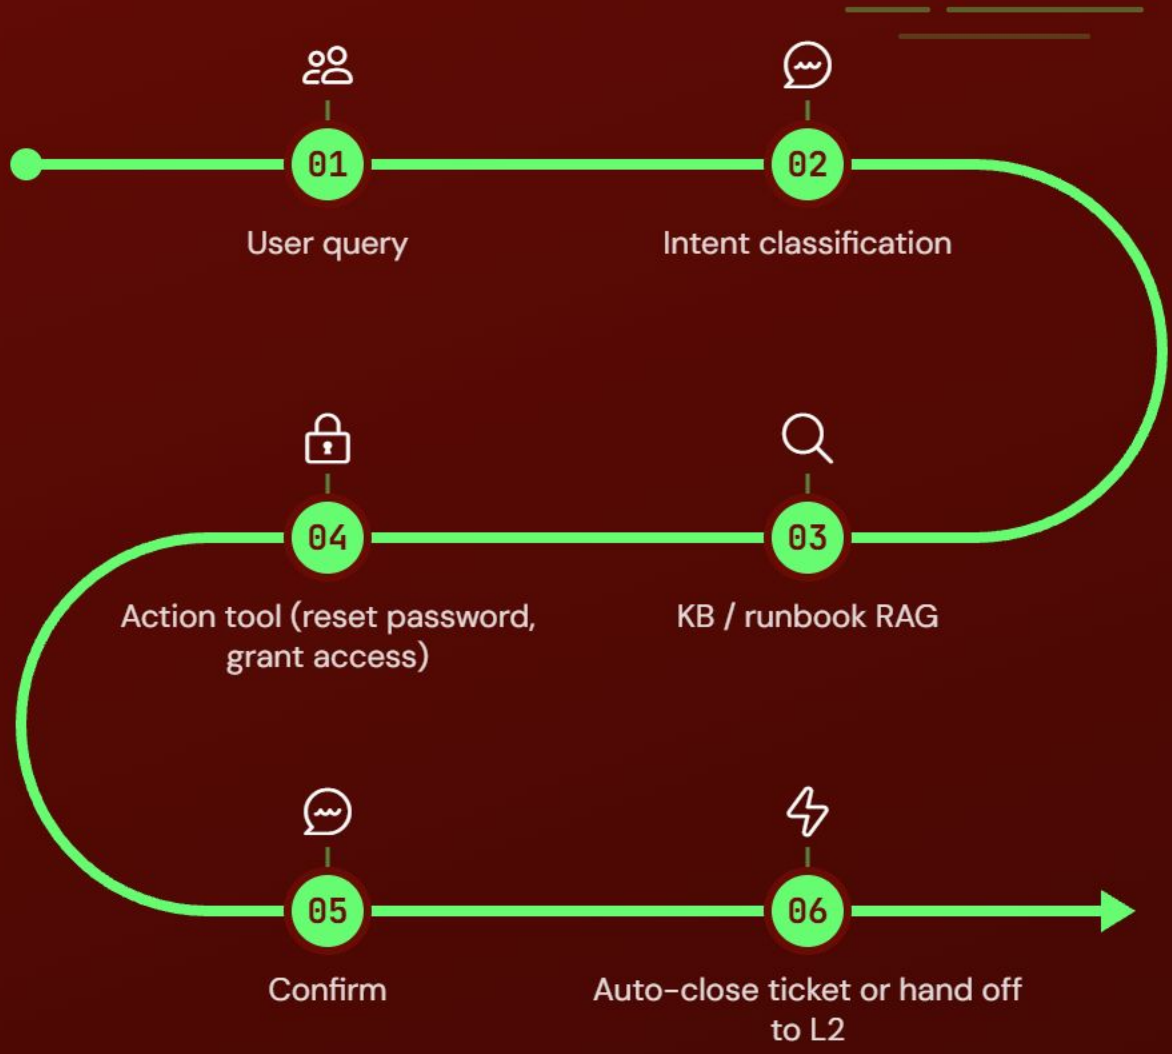

KEY CAPABILITIES

- Personalised answers from HRIS data (leave balance, benefits plan)
- Policy search across countries and versions
- Raises HR cases with full context when unresolved
- Works inside Teams, Slack or the HR portal

A · KNOWLEDGE & SEARCH

IT Service Desk Assistant

An L1 support agent that resolves common IT requests such as password resets, access requests and how-to questions on its own. It searches knowledge articles and runbooks, performs approved actions through IT tools, and hands off to L2 with a complete summary when it cannot resolve the issue.

INTEGRATES WITH

ServiceNow ITSM & AI Agents, Jira Service Management, Freshservice, Moveworks, Okta, Entra ID, Intune / Jamf, Microsoft Teams, Slack

VALUE & KPIS

- Auto-resolution rate
- L1 ticket volume
- Cost per ticket
- Mean time to resolve
- First-contact resolution
- Employee CSAT

A · KNOWLEDGE & SEARCH

Executive Initiative Intelligence Agent

A knowledge base and agent for leadership and steering committees that tracks strategic initiatives across the enterprise. Leaders ask about progress, risks and decisions in plain language, and the agent's episodic memory recalls earlier discussions so answers build on prior context.

INTEGRATES WITH

SharePoint, Jira, Planview, ServiceNow SPM, Smartsheet, Asana, Power BI, Bedrock AgentCore Memory, Microsoft Teams, Outlook

VALUE & KPIS

- Status look-up time
- Meeting prep time
- Report hours saved
- Executive weekly users
- Risks flagged early
- Answer accuracy

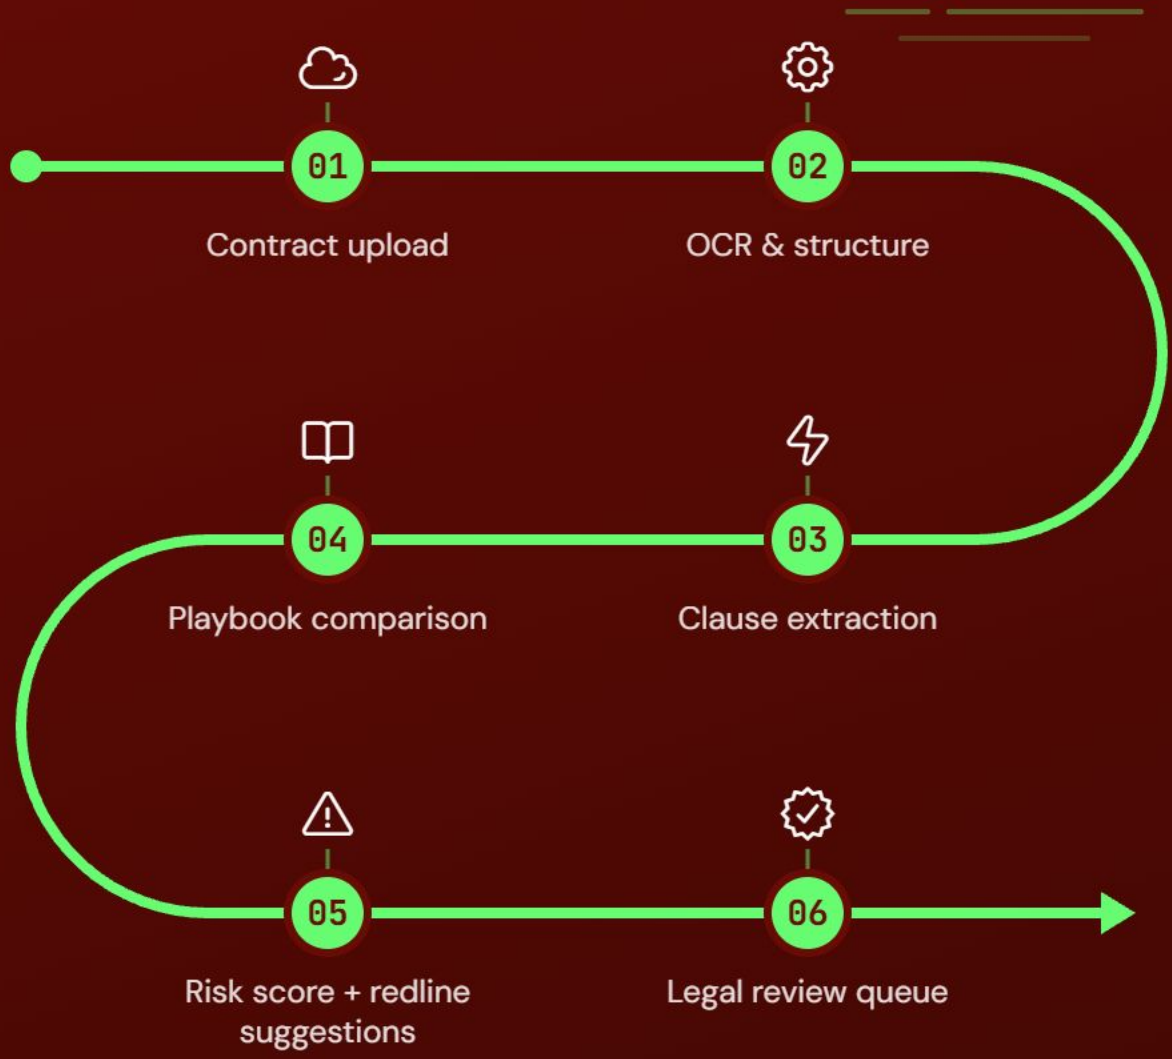

KEY CAPABILITIES

- Status, risk and decision summaries per initiative
- Episodic memory of previous sessions and decisions
- Cross-initiative insights (dependencies, delays, budget)
- Meeting-ready briefs generated on demand

A · KNOWLEDGE & SEARCH

Contract & Legal Document Intelligence

AI that reads contracts at scale, extracts key clauses, obligations and dates, and compares them against the company's legal playbook. It flags risky or non-standard terms, suggests redlines, and routes only the exceptions to lawyers.

INTEGRATES WITH

Ironclad, DocuSign CLM, Icertis, Agiloft, SharePoint, iManage, NetDocuments, Salesforce, Harvey, Bedrock / Microsoft Foundry

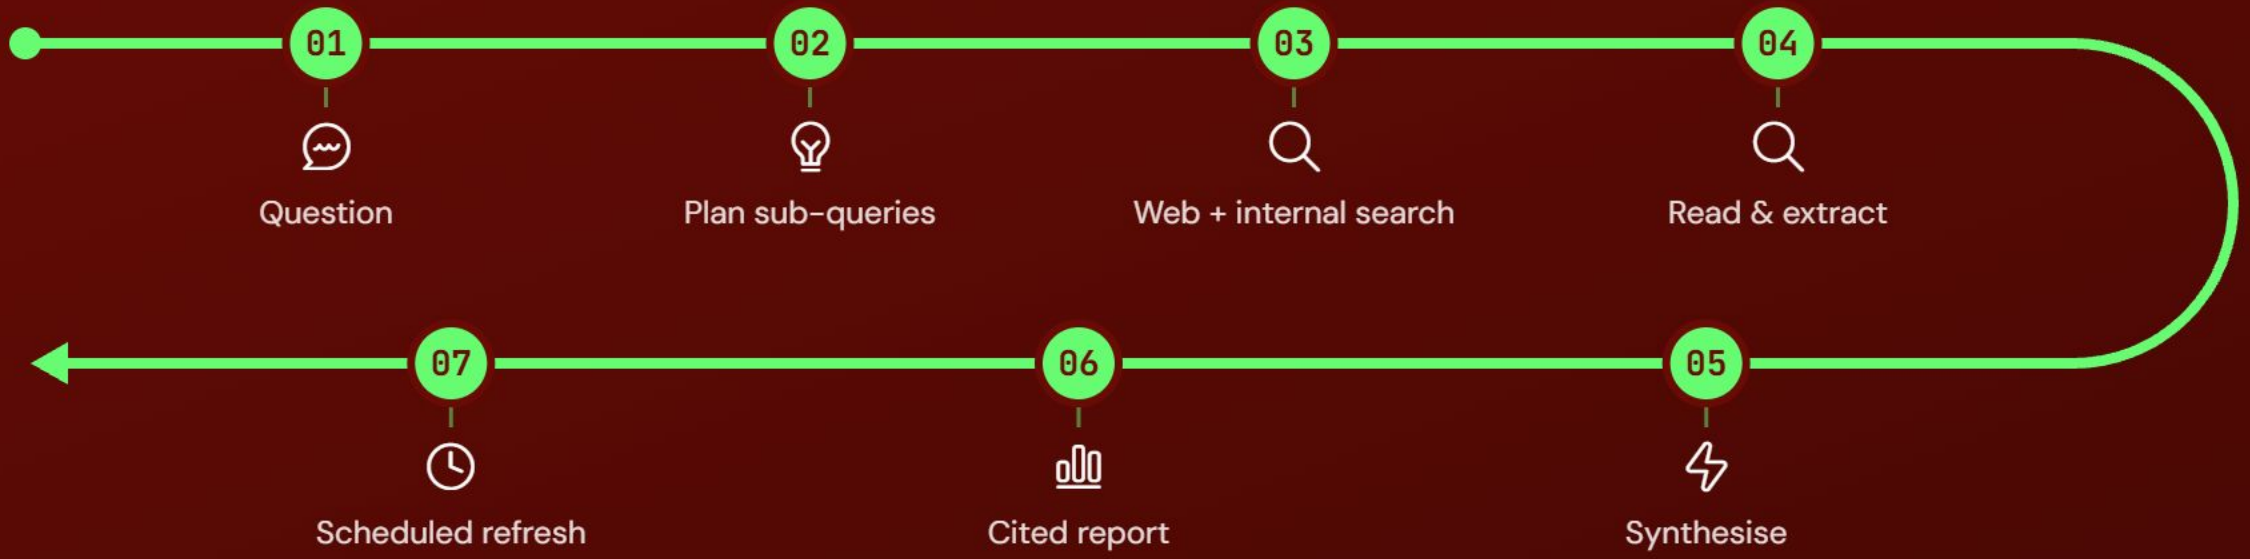

VALUE & KPIS

- Review cycle time
- Risky terms caught
- Contracts per lawyer
- Clause extraction accuracy
- Cost per contract
- Missed renewal dates

A · KNOWLEDGE & SEARCH

Market & Competitive Research Agent

A deep-research agent that plans its own searches across the web and internal sources, reads and cross-checks the findings, and produces a sourced briefing on a market, competitor or technology. Briefs can be refreshed on a schedule to track changes.

INTEGRATES WITH

Web search APIs, Amazon Quick Research, Gemini Deep Research, Perplexity Enterprise, internal KB, CRM, Crunchbase, PitchBook, SharePoint, Slack

VALUE & KPIS

- Analyst hours saved
- Source citation rate
- Briefs per analyst
- Brief turnaround time
- Fact-check error rate
- Stakeholder usefulness

A · KNOWLEDGE & SEARCH

Meeting Intelligence

Automatic capture of meetings that turns recordings into accurate transcripts, concise summaries, decisions and action items. Outputs are pushed into the tools teams already use, so follow-ups don't get lost.

INTEGRATES WITH

Microsoft Teams, Zoom, Google Meet, Webex, Amazon Transcribe, Otter.ai, Fireflies, Jira, Salesforce, HubSpot, Outlook / Gmail

VALUE & KPIS

- Note-taking time saved
- Follow-up turnaround
- Meetings captured
- Action-item completion
- Transcript accuracy
- User adoption

KEY CAPABILITIES

- Transcription with speaker identification
- Summaries, decisions and owners for action items
- Auto-create Jira tasks, CRM notes or emails
- Searchable archive of past meetings

A · KNOWLEDGE & SEARCH

Engineering & Codebase Knowledge Assistant

An assistant that understands the company's code, architecture decisions and incident history. Engineers ask how a service works or why something was built a certain way and get answers with links to the exact files and documents.

INTEGRATES WITH

GitHub, GitLab, Bitbucket, Confluence, Backstage, Jira, Sourcegraph, Claude Code, GitHub Copilot, Amazon Q Developer, PagerDuty history

VALUE & KPIS

- Onboarding to first PR
- Answer accuracy
- Senior-engineer interruptions
- Time to find context
- Developer adoption
- Docs coverage

KEY CAPABILITIES

- Code-aware search across repositories
- Explains services, APIs and dependencies
- Links answers to files, ADRs and past incidents
- Speeds up onboarding of new engineers

A · KNOWLEDGE & SEARCH

Multilingual Translation & Localisation

LLM-powered translation that keeps brand terminology and tone consistent across languages. It uses glossaries and translation memory, scores its own quality, and sends only low-confidence content for human review.

INTEGRATES WITH

DeepL, Amazon Translate, Google Cloud Translation, Phrase, Smartling, Lokalise, Contentful, Adobe Experience Manager, Zendesk Guide, Figma

VALUE & KPIS

- Cost per word
- Quality score (MQM / COMET)
- Glossary compliance
- Time to market per language
- Human post-edit rate
- Languages supported

KEY CAPABILITIES

- Glossary and brand-voice enforcement
- Quality estimation with human review for low scores
- Translates documents, support content and product UI
- Publishes directly to CMS and help centres

Customer Service

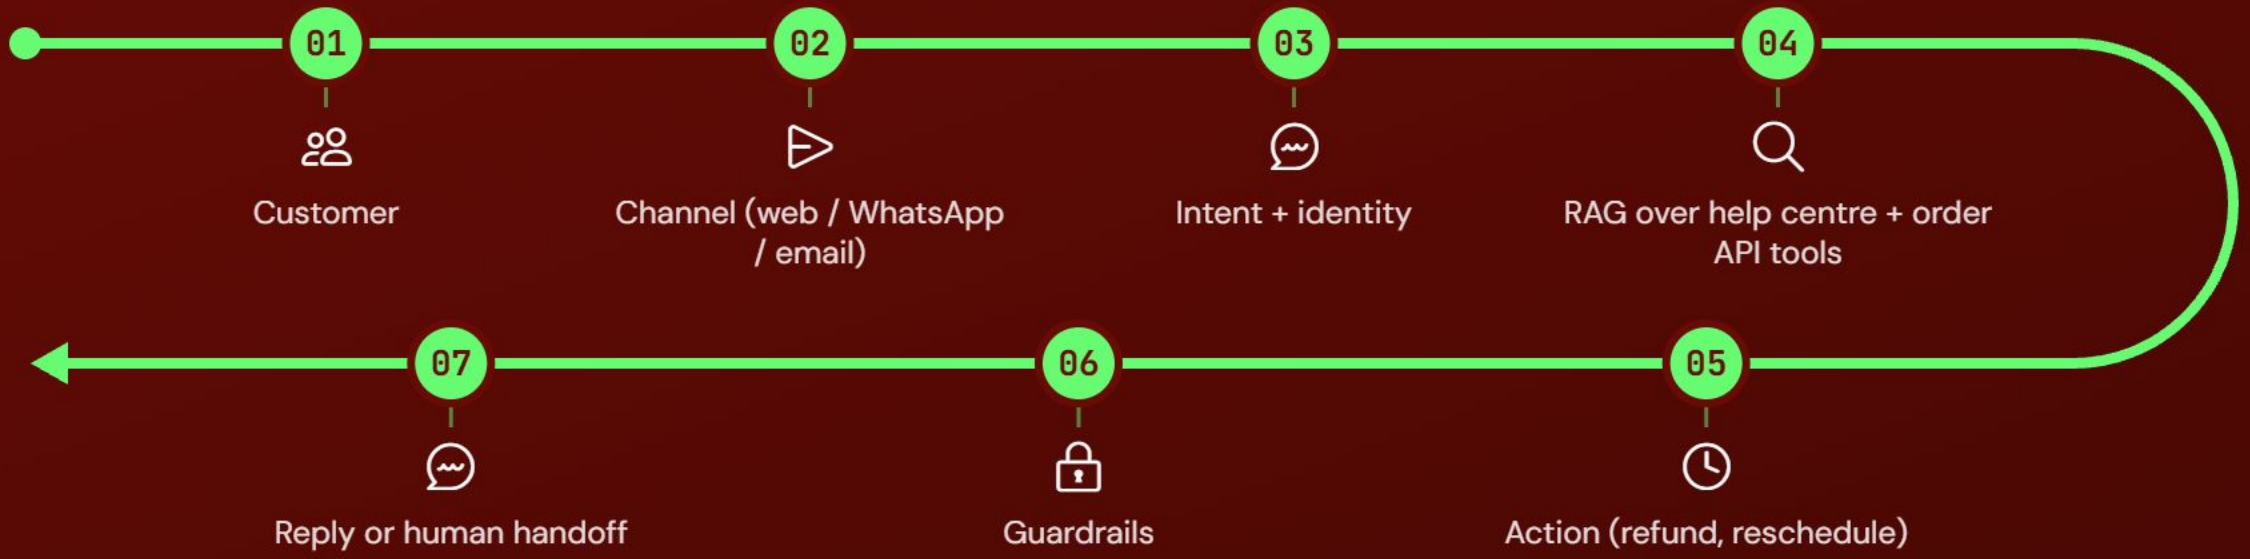

Resolving customer queries faster across chat, email and voice.

- AI Customer Support Agent (chat & email)
- Voice AI Contact Centre Agent
- Real-Time Agent Assist
- Ticket Triage & Smart Routing
- Voice of Customer & Sentiment Analytics

B · CUSTOMER SERVICE

AI Customer Support Agent (chat & email)

A customer-facing agent that resolves queries end to end across web chat, WhatsApp and email. Beyond answering questions, it takes real actions such as refunds, order changes and rescheduling, within guardrails, and hands off to a human with full context when needed.

INTEGRATES WITH

Zendesk AI agents, Salesforce Agentforce Service, Intercom Fin, ServiceNow CSM, Sierra, Shopify, Stripe, order / OMS APIs, WhatsApp Business, Bedrock AgentCore

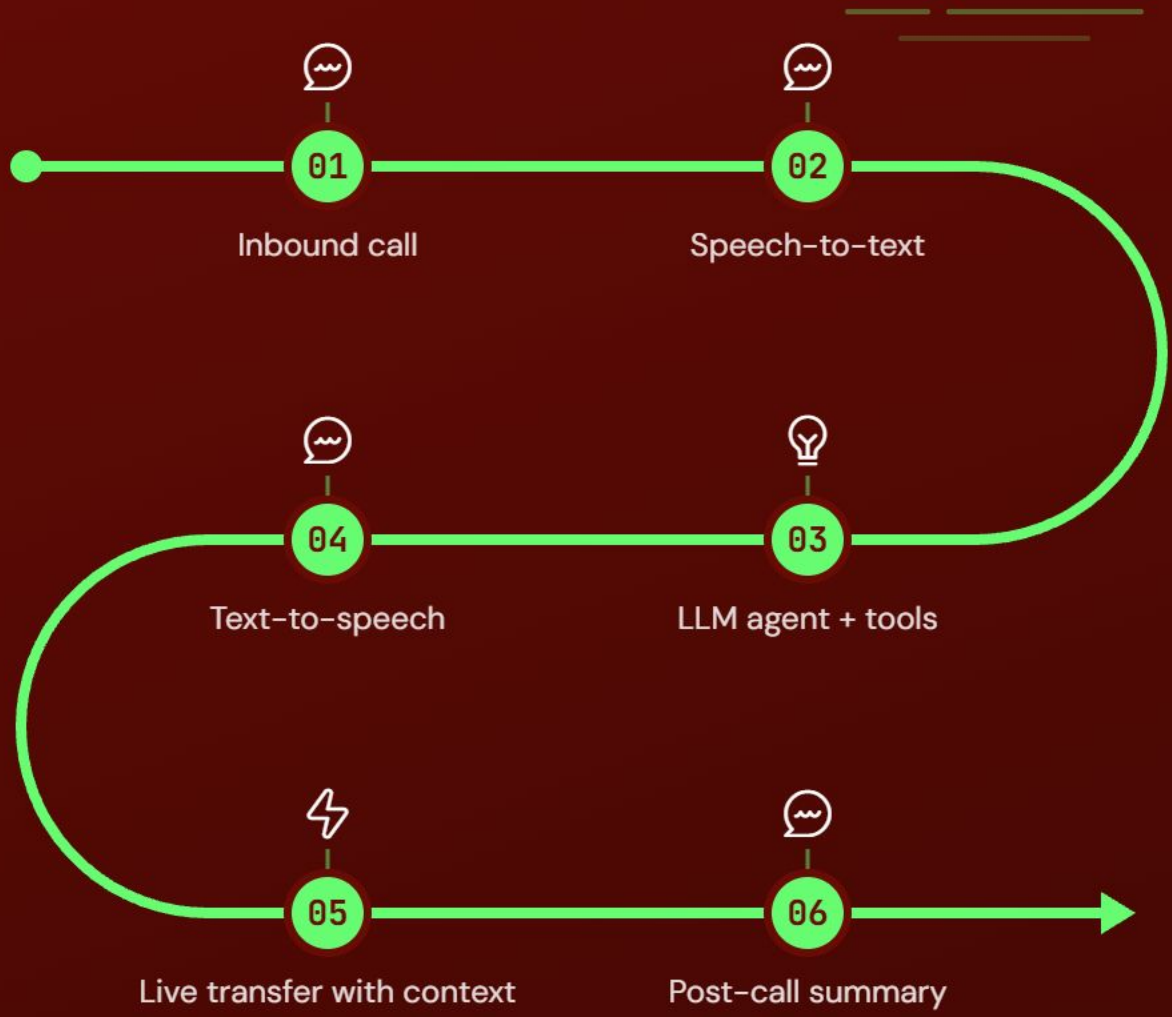

VALUE & KPIS

- Resolution rate
- Repeat contact (48h)
- Cost per contact
- Containment rate
- CSAT on AI conversations
- Escalation rate

B · CUSTOMER SERVICE

Voice AI Contact Centre Agent

A natural-sounding phone agent that handles high-volume calls such as bookings, order status and payments. It understands speech in real time, uses business systems as tools, and transfers to a human agent with a summary when a call needs one.

INTEGRATES WITH

Amazon Connect, Amazon Nova Sonic, Genesys Cloud AI, NICE CXone Mpower, Five9, Google Customer Engagement Suite, Twilio, ElevenLabs, Deepgram, Salesforce

VALUE & KPIS

- Call containment
- Abandonment rate
- Cost per call
- Average handle time
- Warm-transfer rate
- Voice CSAT

B · CUSTOMER SERVICE

Real-Time Agent Assist

A copilot for human contact-centre agents that listens to live conversations and suggests answers, compliance reminders and next-best actions on screen. After the call it writes the wrap-up notes automatically.

INTEGRATES WITH

Amazon Connect Contact Lens, Genesys Agent Copilot, NICE CXone Copilot, Dynamics 365 Contact Center, Salesforce Service Cloud, Zendesk, Cresta, knowledge bases

VALUE & KPIS

- Average handle time
- After-call work time
- QA / compliance score
- First-contact resolution
- New-agent ramp time
- Agent attrition

KEY CAPABILITIES

- Live transcription with intent and sentiment
- Suggested replies from the knowledge base
- Compliance and script prompts in real time
- Automatic after-call summaries and CRM updates

B · CUSTOMER SERVICE

Ticket Triage & Smart Routing

AI that reads every incoming ticket, classifies its category, urgency and language, detects duplicates, and routes it to the right team. Simple tickets get an instant automated reply, cutting first-response time.

INTEGRATES WITH

ServiceNow, Zendesk, Jira Service Management, Freshdesk, Salesforce Service Cloud, Intercom, Outlook / Gmail, Slack, Bedrock / Azure OpenAI classifiers

VALUE & KPIS

- Misroute rate
- SLA breach rate
- Backlog age
- First response time
- Auto-reply resolution
- Classification accuracy

KEY CAPABILITIES

- Category, priority and language classification
- Duplicate and related-ticket detection
- Routing by skill, customer tier and SLA
- Auto-replies for simple, known issues

B · CUSTOMER SERVICE

Voice of Customer & Sentiment Analytics

Analysis of reviews, surveys, tickets and call transcripts to find what customers are happy or unhappy about. It clusters themes, tracks sentiment trends and raises early warnings of churn.

INTEGRATES WITH

Qualtrics, Medallia, Sprinklr, Zendesk, Salesforce, Gong, app-store reviews, Trustpilot, Snowflake / Databricks, Power BI, Tableau

VALUE & KPIS

- NPS / CSAT trend
- Churn-risk accounts flagged
- Issues fixed from VoC
- Time to insight
- Theme coverage
- Retention uplift

KEY CAPABILITIES

- Topic and sentiment extraction across channels
- Trend and emerging-issue detection
- Churn-risk signals per customer segment
- Insight dashboards and alerts for product teams

C

Sales

Helping sellers find, win and grow accounts with less admin.

- Lead Scoring & Enrichment
- AI SDR / Personalised Outbound
- Sales Call Intelligence & Coaching
- Sales Copilot / Auto-CRM Hygiene
- RFP & Proposal Response Automation
- Competitive Price Intelligence & Dynamic Pricing

C · SALES

Lead Scoring & Enrichment

Automatic enrichment of every inbound lead with company and contact data, followed by AI scoring of fit and intent. Reps see the best leads first, with a short explanation of why each one scored high.

INTEGRATES WITH

Salesforce, HubSpot, Dynamics 365 Sales, ZoomInfo, Apollo, 6sense, Demandbase, Clay, Clearbit (HubSpot), Marketo

VALUE & KPIS

- Lead-to-opportunity rate
- MQL → SQL conversion
- Pipeline from top leads
- Speed to lead
- Score precision
- Rep time per lead

KEY CAPABILITIES

- Firmographic and contact enrichment
- ML + LLM fit and intent scoring with reasons
- Automatic routing to the right rep
- CRM fields kept up to date

C · SALES

AI SDR / Personalised Outbound

An AI sales development rep that researches target accounts, maps buying personas, and drafts personalised multi-step outreach. Reps approve messages before sending, and replies are classified to book meetings faster.

INTEGRATES WITH

Outreach, Salesloft, Apollo, HubSpot, Agentforce SDR, 11x, Clay, LinkedIn Sales Navigator, Gmail / Outlook, Gong

VALUE & KPIS

- Positive reply rate
- Opportunity creation rate
- Inbox placement
- Meetings held
- Pipeline per outbound $
- Message error rate (QA)

C · SALES

Sales Call Intelligence & Coaching

Analysis of every sales call to surface objections, competitor mentions, next steps and deal risk. Managers get coaching insights at scale, and the CRM is updated without manual note-taking.

INTEGRATES WITH

Gong, Clari Copilot, Chorus by ZoomInfo, Salesloft, Zoom, Microsoft Teams, Google Meet, Salesforce, HubSpot, Dynamics 365

VALUE & KPIS

- Win rate
- Ramp time to quota
- Coaching sessions per rep
- Forecast accuracy
- Deal slippage
- Talk-to-listen ratio

KEY CAPABILITIES

- Objection, competitor and pricing-mention detection
- Talk ratio and call-quality coaching feedback
- Deal-risk scoring for forecasting
- Automatic call notes in the CRM

C · SALES

Sales Copilot / Auto-CRM Hygiene

A copilot that keeps the CRM accurate by capturing activity from emails, calendars and calls, and prepares reps before every meeting with account history, news and open issues. It also drafts follow-ups.

INTEGRATES WITH

Agentforce Sales, Microsoft 365 Copilot for Sales, HubSpot Breeze, Gmail / Outlook, Google / Outlook Calendar, Gong, LinkedIn Sales Navigator, Slack

VALUE & KPIS

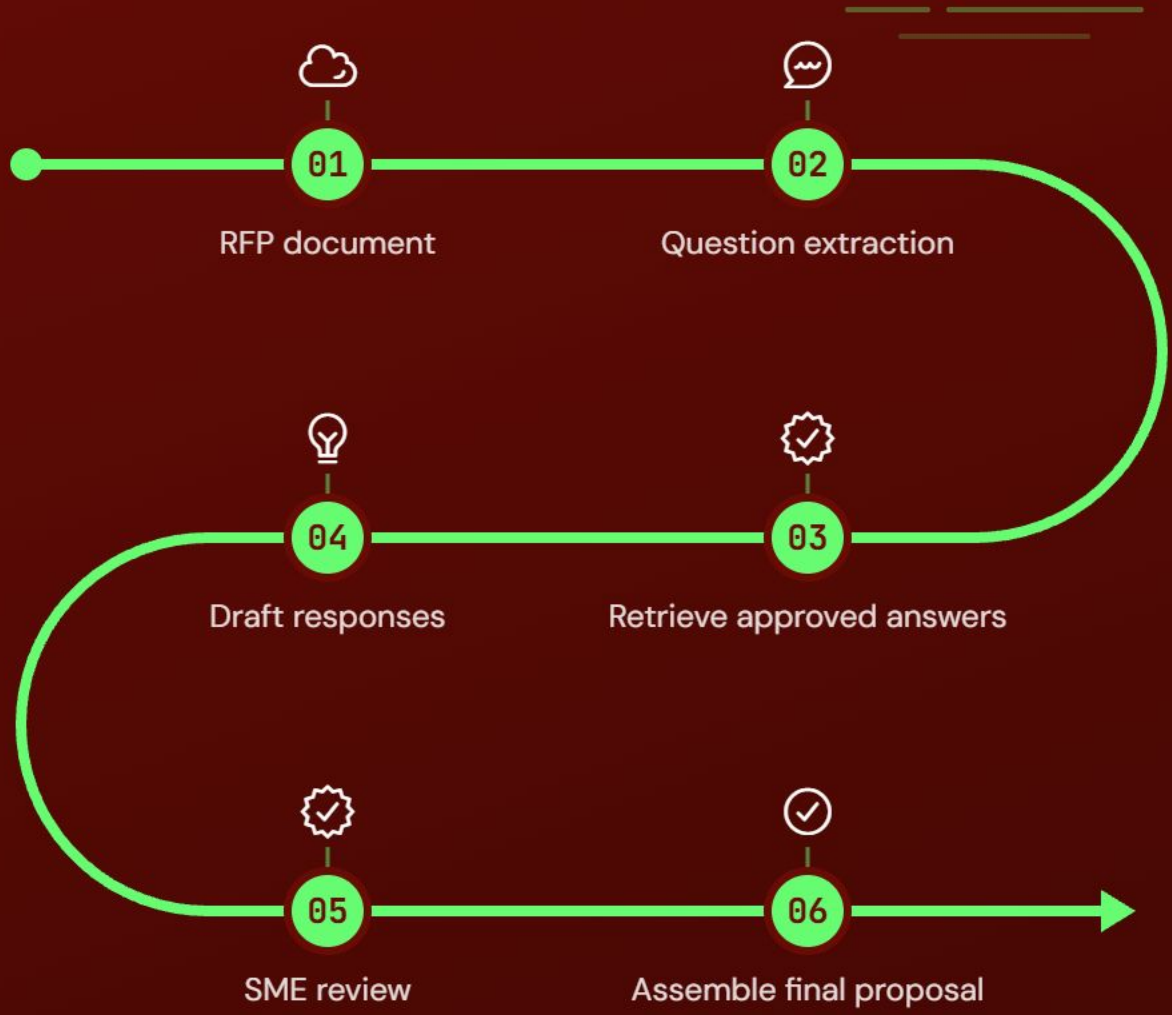

- CRM field completeness
- Selling time share
- Pipeline hygiene score
- Admin hours saved per rep
- Follow-up speed
- Forecast accuracy

KEY CAPABILITIES

- Automatic CRM activity and field updates
- Pre-meeting account briefs
- Follow-up email drafts after meetings
- Pipeline summaries for managers

RFP & Proposal Response Automation

AI that drafts answers to RFPs and security questionnaires from a library of approved past responses. Subject-matter experts review and refine instead of writing from scratch, so teams can respond to more bids, faster.

INTEGRATES WITH

Loopio, Responsive (RFPIO), Inventive AI, SharePoint, Google Drive, Confluence, Salesforce, Microsoft Word, Seismic, Highspot

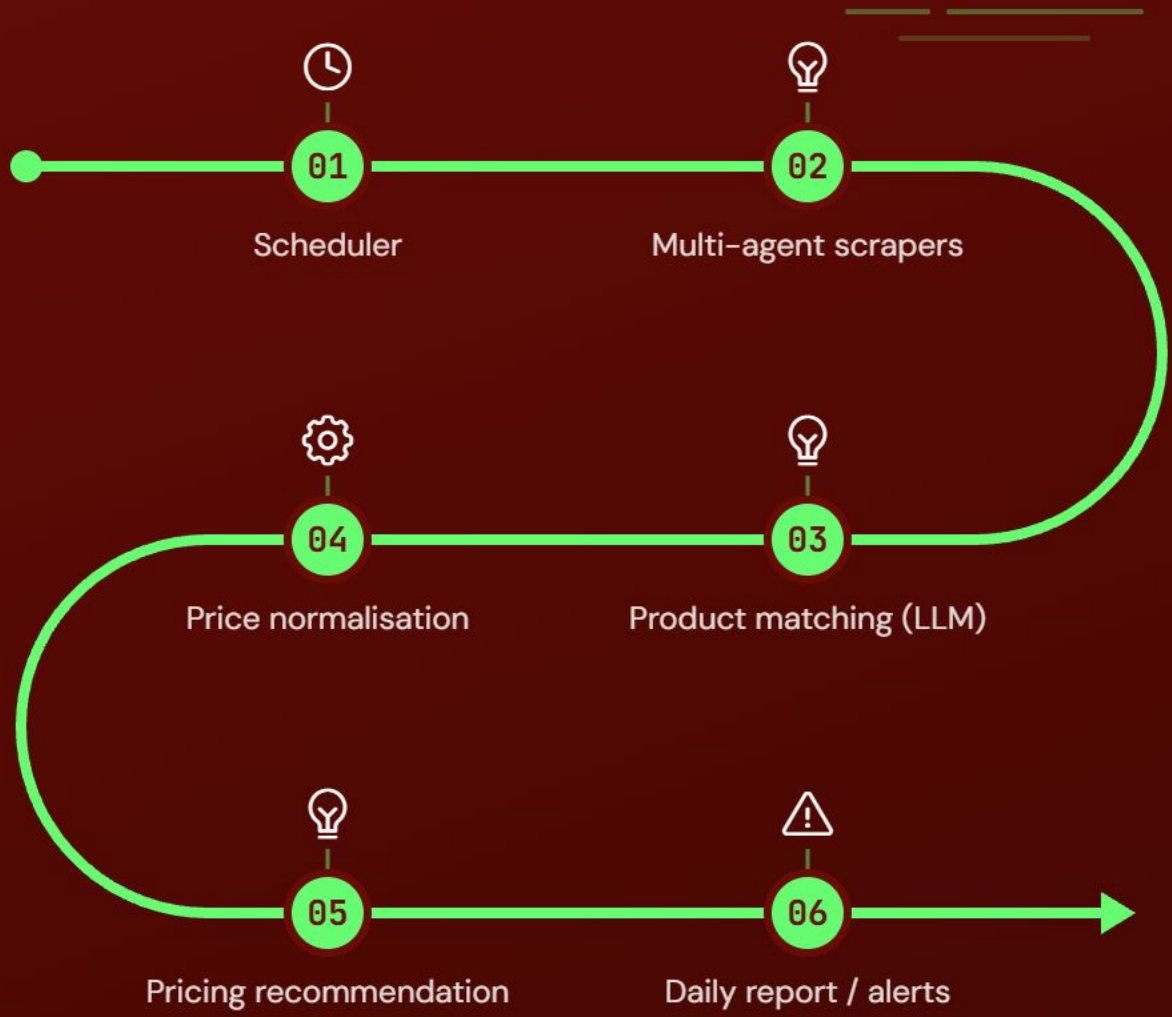

VALUE & KPIS

- Response cycle time
- Win rate
- Answer reuse rate
- RFPs answered per quarter
- SME hours per RFP
- Content freshness

C · SALES

Competitive Price Intelligence & Dynamic Pricing

A team of agents that continuously monitors competitor prices across marketplaces and websites, matches equivalent products, and recommends pricing changes. Reports and alerts replace hours of manual price research.

INTEGRATES WITH

Amazon, Flipkart, Shopify, competitor websites, Scrapy / Playwright, Bright Data, ERP pricing, Salesforce CPQ, PROS, Looker Studio, Power BI

VALUE & KPIS

- Gross margin uplift
- Product match accuracy
- Research hours replaced
- Price response time
- Products monitored
- Price-driven win rate

D

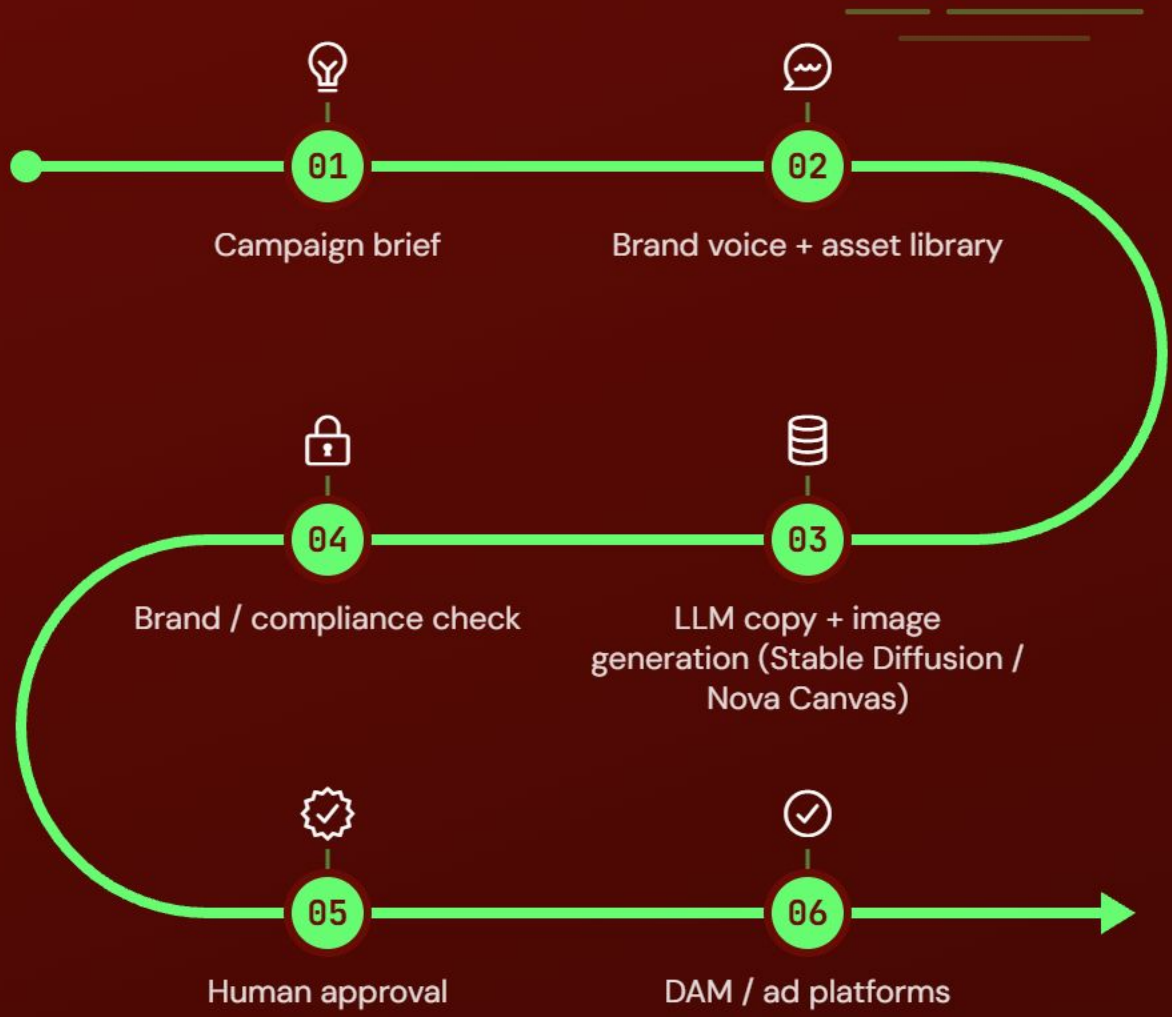

Marketing

Producing on-brand, personalised campaigns at scale.

- Generative Content Studio with Brand Guardrails
- Autonomous Campaign Management Agents
- Hyper-Personalisation & Recommendations
- SEO & Generative Engine Optimisation (GEO)
- Social Listening & Brand Monitoring

Generative Content Studio with Brand Guardrails

A content studio that produces on-brand copy, images and video variants for campaigns at scale. Brand-voice rules and compliance checks run automatically, and every asset passes human approval before publishing.

INTEGRATES WITH

Adobe Firefly & GenStudio, Canva, Amazon Nova Canvas / Reel, Midjourney, Runway, Writer, Jasper, Adobe Experience Manager, Bynder, Meta / Google Ads

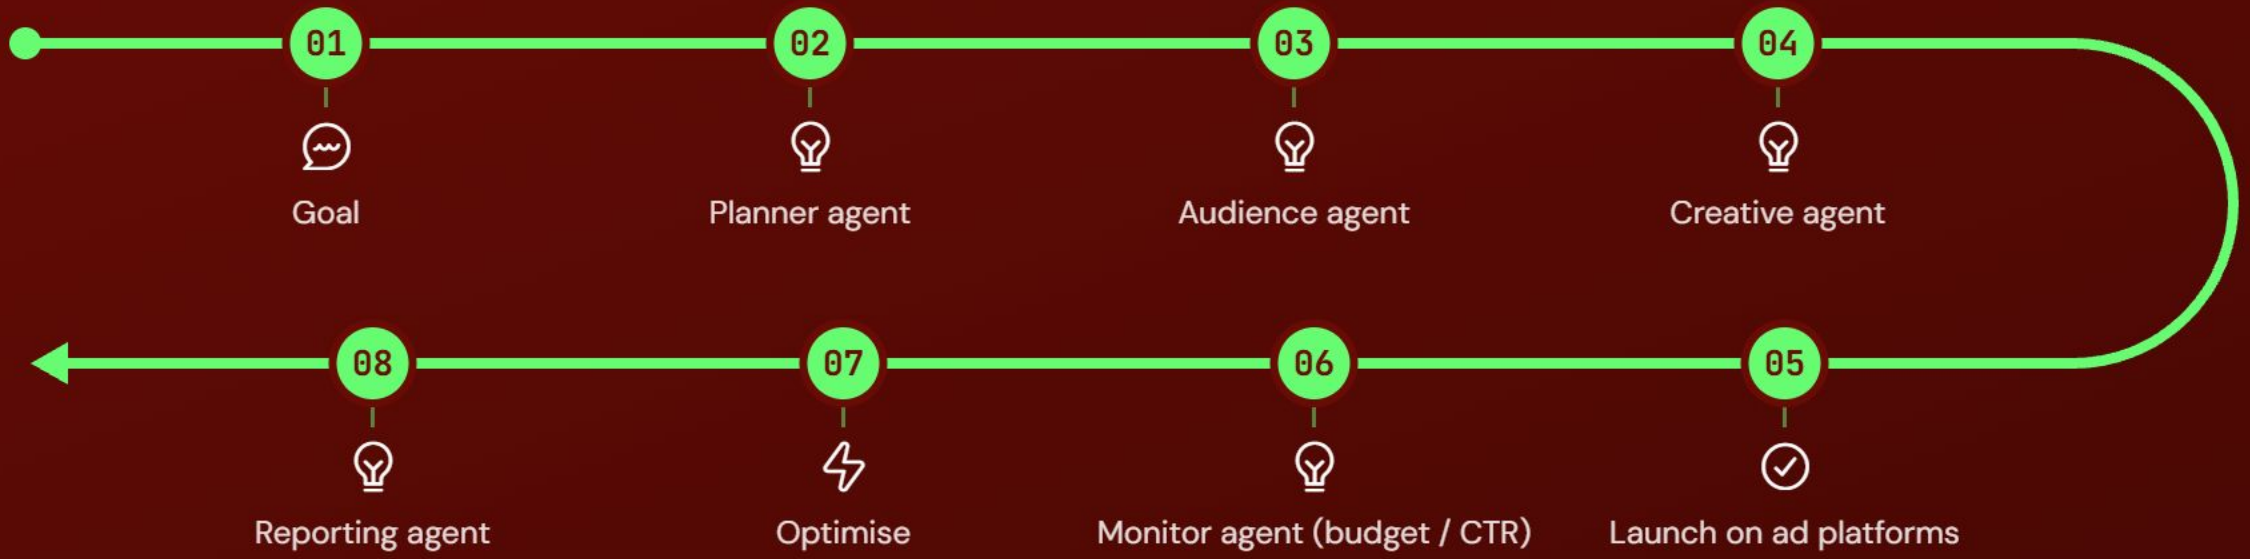

VALUE & KPIS

- Content cycle time
- Variants per campaign
- Engagement / CTR
- Cost per asset
- Brand-check pass rate
- Approval rounds

D · MARKETING

Autonomous Campaign Management Agents

A multi-agent team that plans campaigns, selects audiences, creates assets, launches across ad platforms, watches performance and reallocates budget. A reporting agent summarises results for the marketing team.

INTEGRATES WITH

Google Ads, Meta Ads, LinkedIn Ads, HubSpot, Salesforce Marketing Cloud, Braze, GA4, CrewAI, LangGraph, Looker Studio

VALUE & KPIS

- ROAS
- Time to launch
- Budget reallocation speed
- Cost per acquisition
- Manual hours saved
- Conversion rate

D · MARKETING

Hyper-Personalisation & Recommendations

One-to-one personalisation of products, content and offers based on each customer's behaviour and history. Recommendation models pick what to show, and LLMs write the personalised message for each channel.

INTEGRATES WITH

Amazon Personalize, Segment, Salesforce Data Cloud, Adobe Real-Time CDP, Braze, Iterable, Algolia, Dynamic Yield, Optimizely, Bloomreach

VALUE & KPIS

- Conversion rate
- Click-through rate
- Revenue per visitor
- Average order value
- Repeat purchase rate
- Incremental lift (A/B)

KEY CAPABILITIES

- Real-time product and content recommendations
- LLM-written personalised emails and push messages
- Customer segments built from behaviour data
- Continuous A/B testing and learning

D · MARKETING

SEO & Generative Engine Optimisation (GEO)

Content optimisation for both classic search engines and AI assistants that now answer questions directly. It finds gaps, drafts structured content, and tracks rankings and how often AI answers cite the brand.

INTEGRATES WITH

Google Search Console, GA4, Semrush, Ahrefs, BrightEdge, Profound, Contentful, WordPress, Webflow, schema.org markup

VALUE & KPIS

- Organic traffic
- Citations in AI answers
- Content production time
- AI-answer share of voice
- Keyword rankings
- Organic conversions

KEY CAPABILITIES

- Keyword and AI-answer gap analysis
- Content briefs and drafts with structured data
- Ranking and AI-citation tracking
- Technical SEO issue detection

Social Listening & Brand Monitoring

Real-time monitoring of social media and news for brand mentions, trends and emerging crises. Spikes in negative sentiment trigger alerts with suggested responses for the communications team.

INTEGRATES WITH

Brandwatch, Sprinklr, Talkwalker, Meltwater, X, LinkedIn, Reddit, YouTube, TikTok, Kinesis / Kafka, Slack

VALUE & KPIS

- Time to detect a crisis
- Sentiment trend
- Mentions handled
- Share of voice
- Response time
- Engagement rate

KEY CAPABILITIES

- Streaming mention capture across platforms
- Sentiment and topic classification
- Crisis and spike detection with alerts
- Influencer and competitor tracking

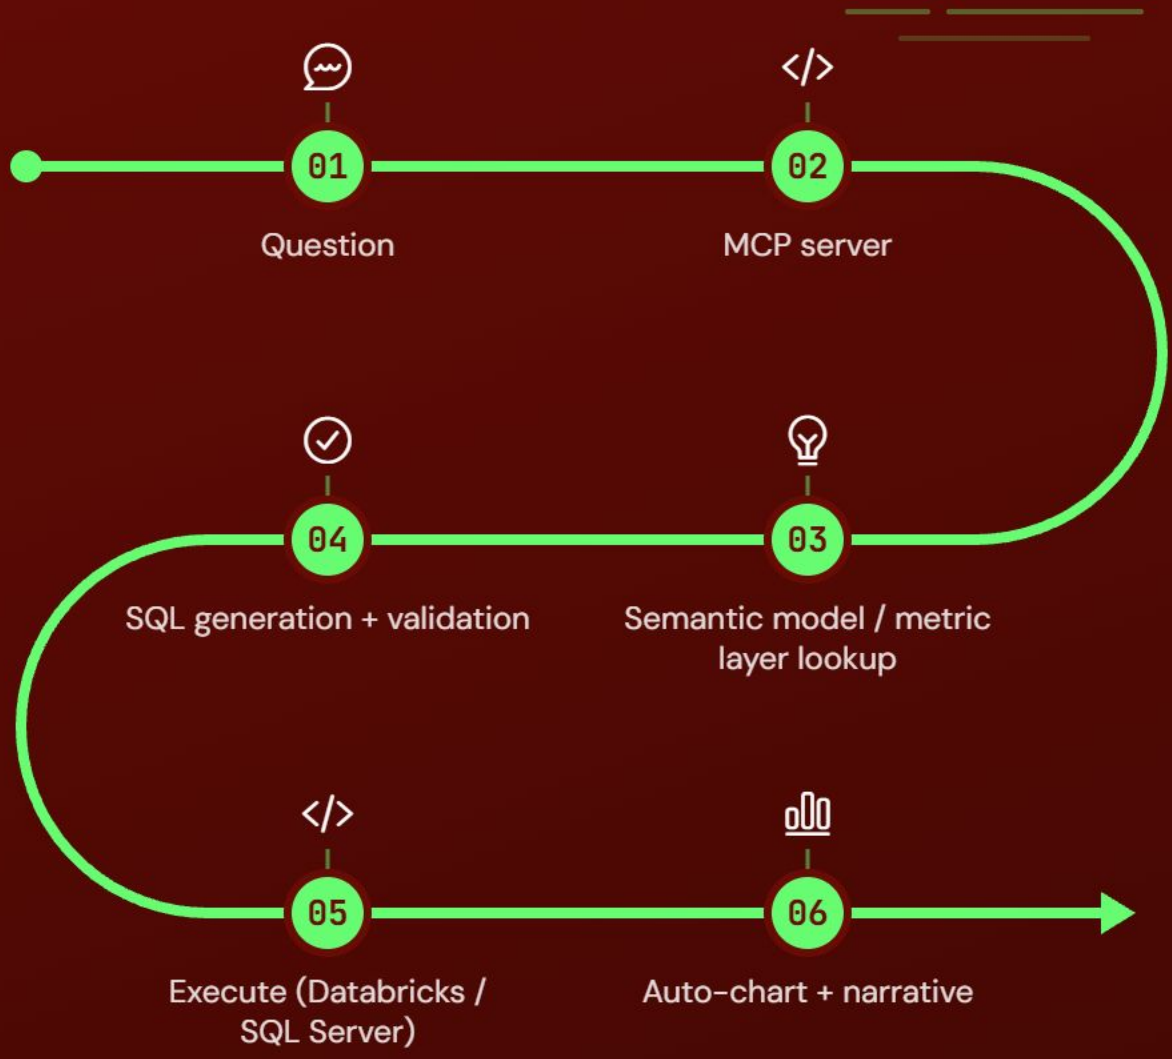

Analytics & BI

Putting insight one question away for every decision-maker.

- Conversational BI / Text-to-SQL Copilot
- Automated Insights & Anomaly Narratives
- Demand & Revenue Forecasting
- Executive KPI Briefing Agent

Conversational BI / Text-to-SQL Copilot

A natural-language interface to company data. Executives and analysts ask questions in plain English, and the copilot uses the governed semantic model to generate and run the right query, then returns a chart with a plain-language explanation.

INTEGRATES WITH

Power BI / Microsoft Fabric, Databricks AI/BI Genie, Snowflake Intelligence, Amazon Quick Sight, Tableau, Looker, SQL Server, dbt Semantic Layer, MCP servers

VALUE & KPIS

- Self-serve question rate
- Analyst backlog
- Executive weekly users
- SQL accuracy (eval set)
- Time to answer
- Governed-metric coverage

E · ANALYTICS & BI

Automated Insights & Anomaly Narratives

AI that monitors key metrics continuously, detects unusual changes, drills down to find which segment or driver caused them, and explains the finding in plain language before anyone has to look for it.

INTEGRATES WITH

Databricks Lakehouse Monitoring, Snowflake, Tableau Pulse, Power BI, Amazon Quick Sight, Anodot, Slack, Microsoft Teams, PagerDuty

VALUE & KPIS

- Time to detect issues
- False-alert rate
- Insights acted on
- Missed anomalies
- Time to root cause
- Revenue at risk caught

KEY CAPABILITIES

- Anomaly detection across KPIs
- Automatic root-cause drill-down by dimension
- Plain-language narratives of what changed
- Alerts in Slack, Teams or email

E · ANALYTICS & BI

Demand & Revenue Forecasting

Machine-learning forecasts of demand and revenue that combine historical data with external signals, with scenario modelling and plain-language explanations of the main drivers for planners and finance teams.

INTEGRATES WITH

Amazon SageMaker, Databricks, Snowflake ML, BigQuery ML, SAP IBP, Anaplan, o9 Solutions, Kinaxis, Power BI

VALUE & KPIS

- Accuracy (MAPE / WAPE)
- Stock-outs
- Planning cycle time
- Forecast bias
- Excess inventory
- Scenario turnaround

KEY CAPABILITIES

- ML forecasts at product, region and channel level
- What-if scenario simulation
- Driver explanations in plain language
- Feeds planning and S&OP tools

E · ANALYTICS & BI

Executive KPI Briefing Agent

An agent that writes a daily or weekly business briefing for leaders. It pulls KPIs, project status and relevant news, compares them with targets, and highlights wins, risks and decisions needed.

INTEGRATES WITH

Power BI, Tableau, Salesforce, Jira, Workday, SAP / NetSuite, Amazon Quick Suite, Outlook, Microsoft Teams, Slack

VALUE & KPIS

- Report prep time
- Decisions surfaced
- Briefing accuracy
- Executive read rate
- Data freshness
- Manual decks retired

KEY CAPABILITIES

- Scheduled briefs by role or business unit
- Performance against target with highlights
- Risks and items needing a decision
- Delivered by email, Teams or audio digest

F

Document & Finance Back-Office

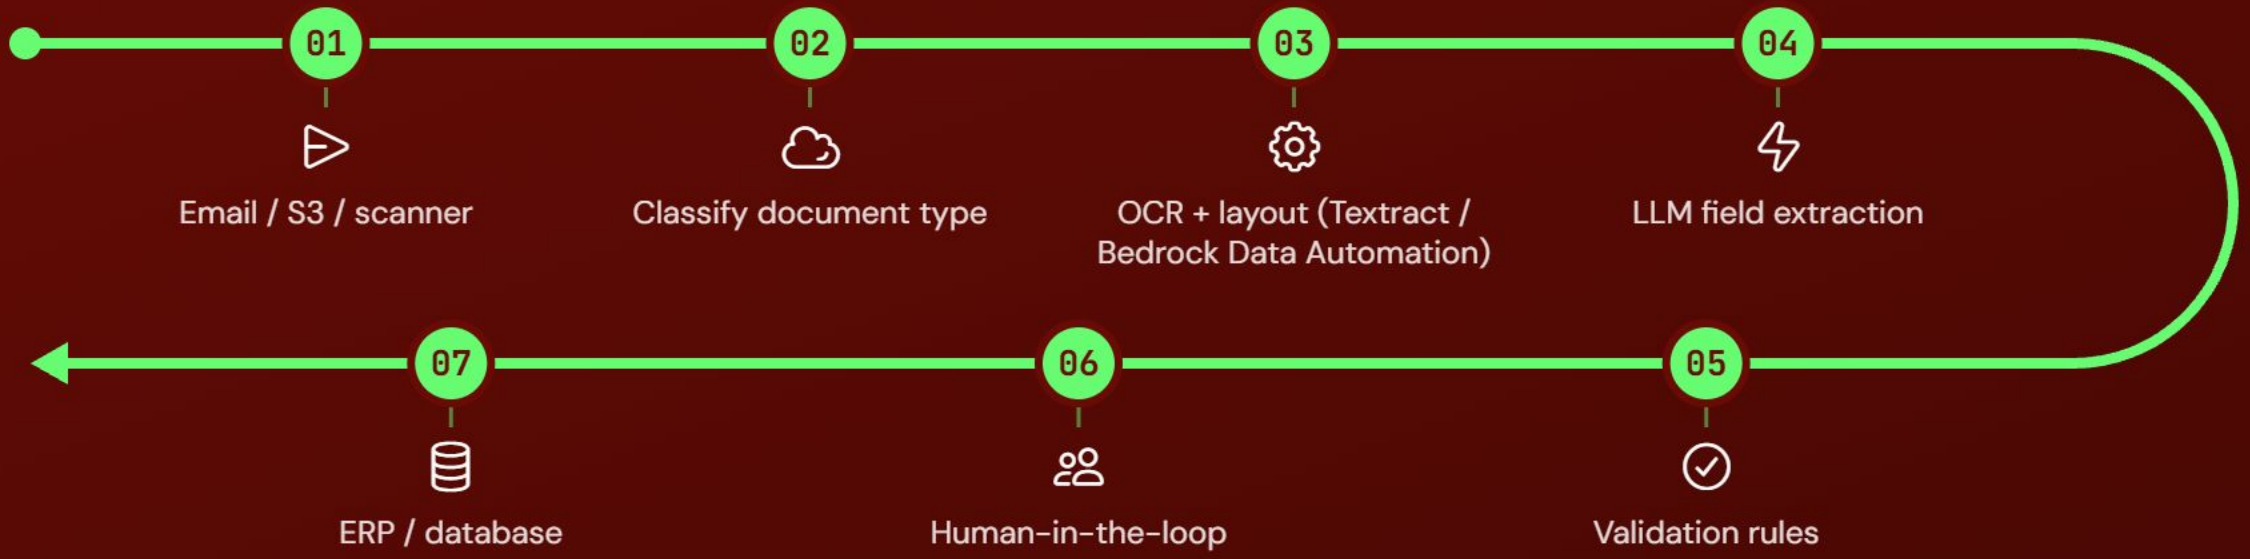

Automating document-heavy finance and compliance work.

- Intelligent Document Processing (IDP)
- Accounts Payable & Invoice Automation
- Financial Close & Reconciliation
- Expense Audit & Fraud Detection
- KYC / AML Onboarding
- Insurance Claims Processing
- Procurement & Supplier Intelligence

F · DOCUMENT & FINANCE BACK-OFFICE

Intelligent Document Processing (IDP)

Automated extraction of structured data from PDFs, scans, forms, tables and images. Documents are classified, read with OCR and layout models, extracted with LLMs, validated against business rules, and only exceptions go to people.

INTEGRATES WITH

Amazon Textract, Bedrock Data Automation, Azure Document Intelligence, Google Document AI, ABBYY Vantage, UiPath IDP, Hyperscience, SAP, Oracle, S3 / SharePoint

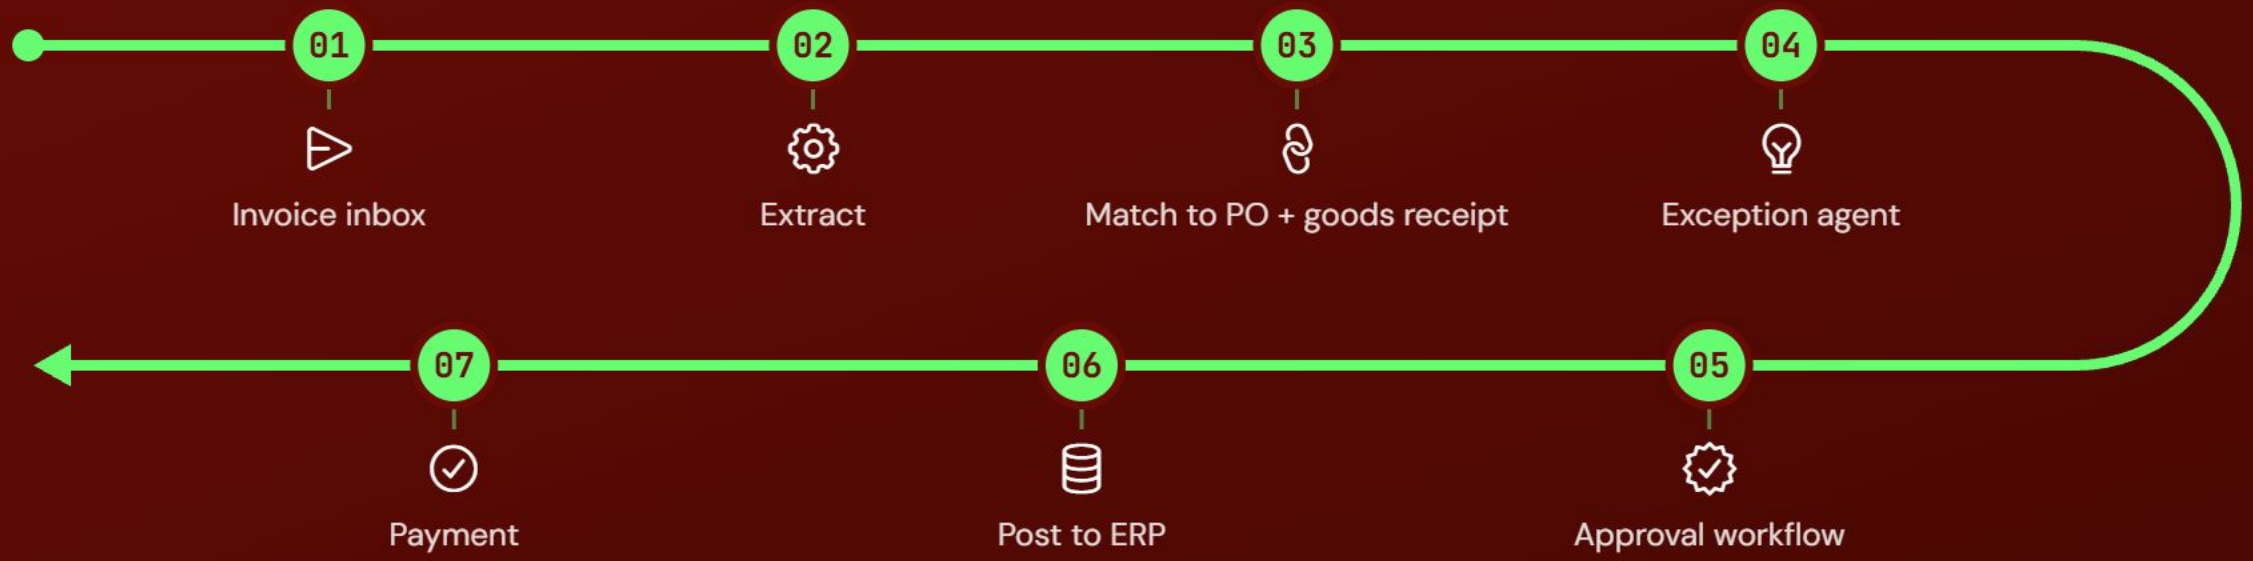

VALUE & KPIS

- Straight-through rate
- Touch rate
- Documents per hour
- Field-level accuracy
- Cost per document
- Exception / rework rate

F · DOCUMENT & FINANCE BACK-OFFICE

Accounts Payable & Invoice Automation

Touchless processing of supplier invoices: capture, extraction, matching to purchase orders and goods receipts, exception handling and approval, then posting to the ERP for payment.

INTEGRATES WITH

SAP S/4HANA, Oracle Fusion, NetSuite, Dynamics 365 Finance, Coupa, Basware, Tipalti, Stampli, BILL, bank payment rails

VALUE & KPIS

- Touchless invoice rate
- Invoice cycle time
- Exception rate
- Cost per invoice
- First-pass match rate
- Discount capture rate

F · DOCUMENT & FINANCE BACK-OFFICE

Financial Close & Reconciliation

AI-assisted month-end close that matches transactions across bank, ERP and sub-ledgers, explains breaks in plain language, and suggests journal entries for controller review.

INTEGRATES WITH

BlackLine, FloQast, Trintech, SAP S/4HANA, Oracle Fusion, NetSuite, Workday Financials, Databricks, bank statement feeds

VALUE & KPIS

- Days to close
- Unreconciled items
- Manual journal entries
- Auto-match rate
- Breaks auto-explained
- Audit adjustments

KEY CAPABILITIES

- Automated transaction matching at scale
- Plain-language explanation of breaks
- Suggested journal entries
- Close-progress tracking and audit trail

F · DOCUMENT & FINANCE BACK-OFFICE

Expense Audit & Fraud Detection

Review of 100% of employee expense claims instead of samples. AI reads receipts, checks claims against policy, and scores fraud risk so auditors focus only on suspicious items.

INTEGRATES WITH

SAP Concur, Expensify, Navan, Ramp, Brex, Workday Expenses, AppZen, Oversight, corporate card feeds, ERP

VALUE & KPIS

- Claims audited (%)
- Leakage recovered
- Reimbursement time
- Policy violations caught
- Audit cost per claim
- False-positive rate

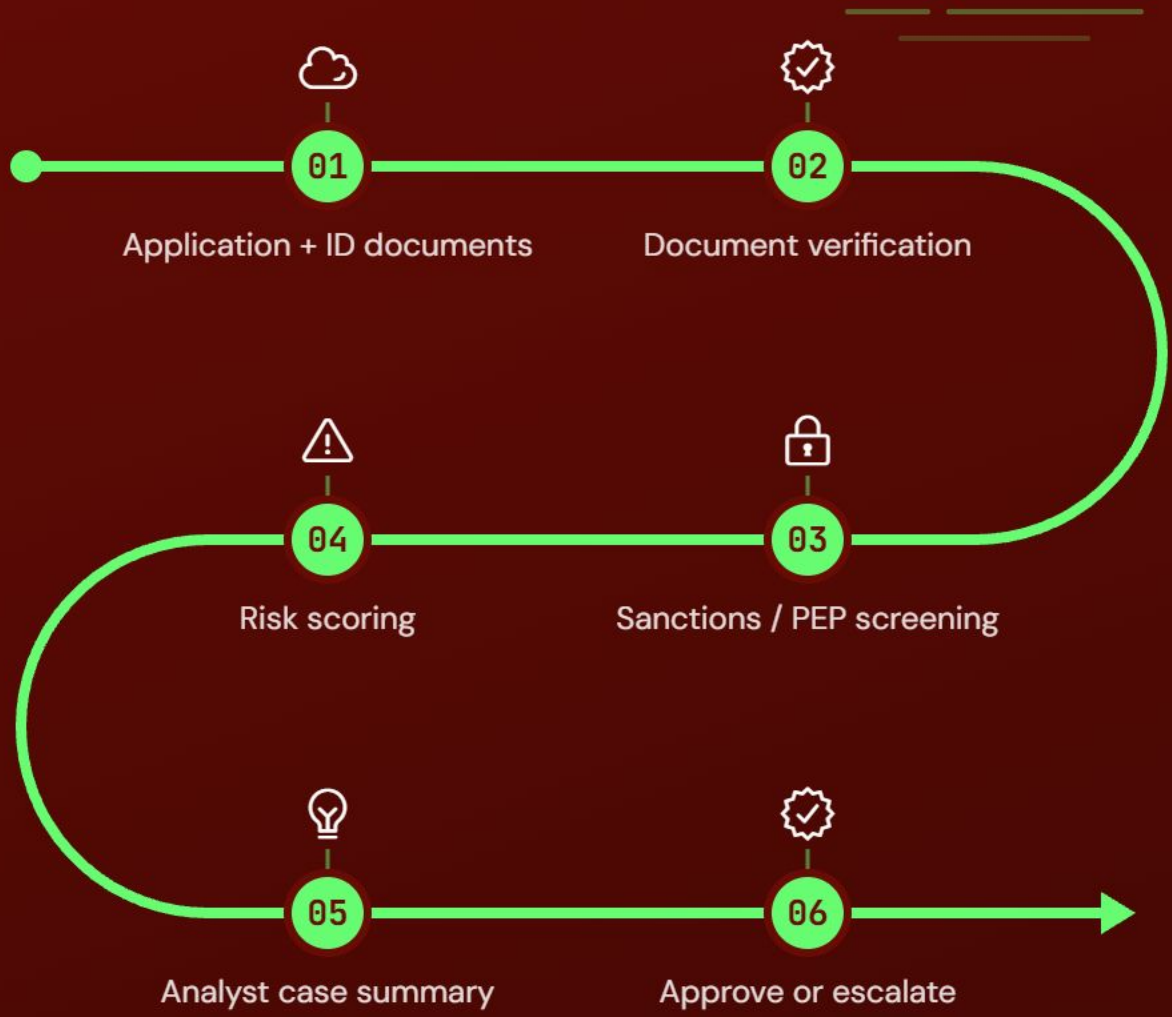

KEY CAPABILITIES

- Receipt OCR and claim matching
- Policy-violation detection
- Fraud and duplicate-claim patterns
- Risk-ranked queue for auditors

F · DOCUMENT & FINANCE BACK-OFFICE

KYC / AML Onboarding

Faster, compliant customer onboarding for banks and fintechs. Identity documents are verified automatically, customers are screened against sanctions and PEP lists, and analysts receive a ready-made risk summary.

INTEGRATES WITH

Onfido (Entrust), Jumio, LexisNexis Risk, LSEG World-Check, ComplyAdvantage, NICE Actimize, Fenergo, core banking, Salesforce Financial Services Cloud

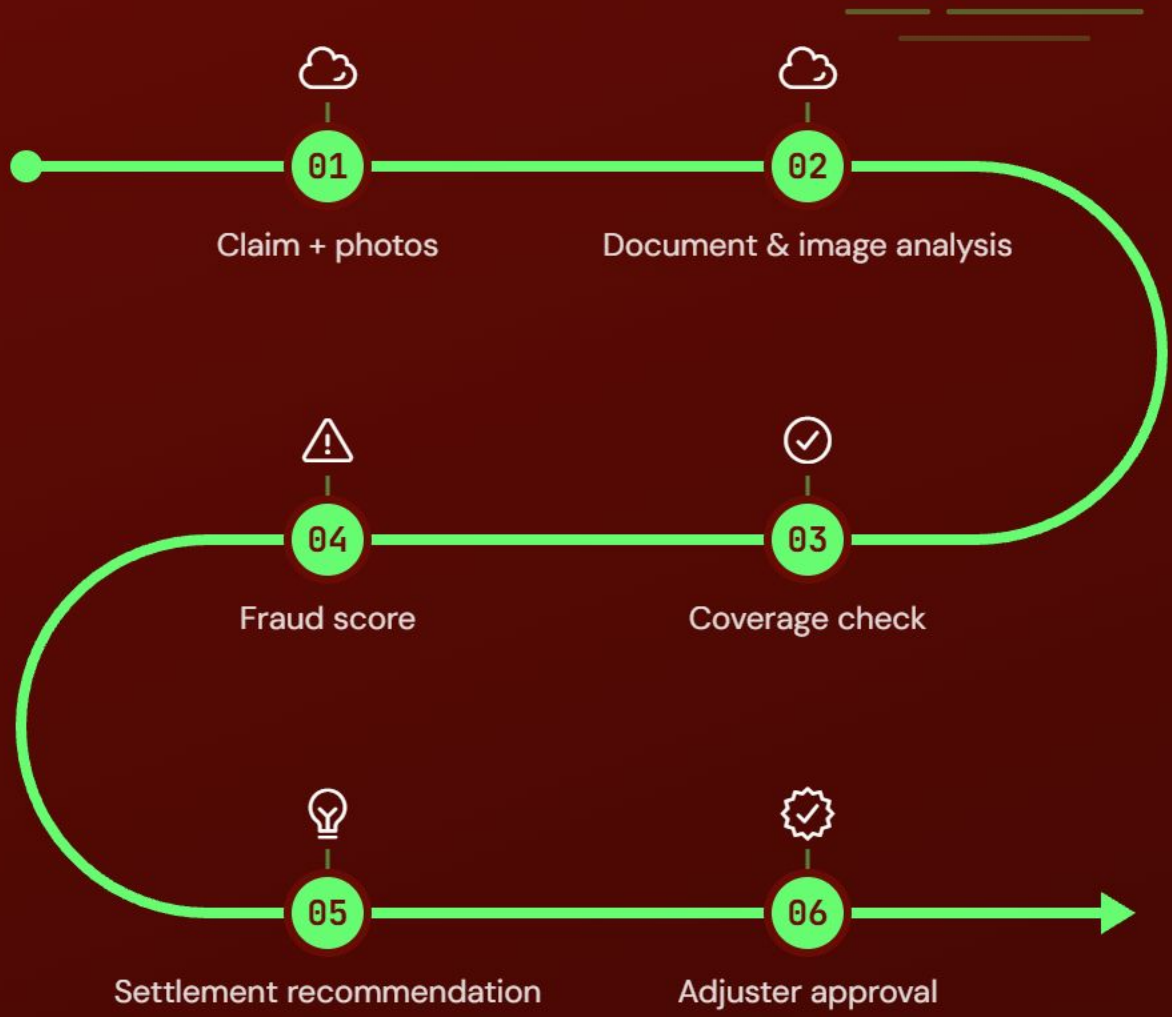

VALUE & KPIS

- Onboarding time
- Screening false positives
- Applicant drop-off
- Straight-through approvals
- Analyst cases per day
- Regulatory findings

F · DOCUMENT & FINANCE BACK-OFFICE

Insurance Claims Processing

End-to-end claims automation from first notice of loss to settlement. AI reads claim documents and photos, checks coverage, scores fraud risk and recommends a settlement for adjuster approval.

INTEGRATES WITH

Guidewire ClaimCenter, Duck Creek, Sapiens, Majesco, Shift Technology, Tractable, CCC Intelligent Solutions, Bedrock Data Automation, payment systems

VALUE & KPIS

- Claim cycle time
- Claims leakage
- Adjuster caseload
- Touchless claims rate
- Fraud detected
- Customer NPS

F · DOCUMENT & FINANCE BACK-OFFICE

Procurement & Supplier Intelligence

AI support for sourcing teams: spend categorisation, supplier discovery and risk checks, quote comparison and negotiation briefs, speeding up purchasing while reducing supplier risk.

INTEGRATES WITH

SAP Ariba, Coupa, Oracle Procurement, Zip, GEP, Jaggaer, Dun & Bradstreet, EcoVadis, Sievo, ERP

VALUE & KPIS

- Realised savings
- Spend under management
- Maverick spend
- Sourcing cycle time
- Supplier risk incidents
- Contract compliance

KEY CAPABILITIES

- Spend classification and analytics
- Supplier discovery and risk scoring
- Quote comparison and negotiation briefs
- Contract compliance monitoring

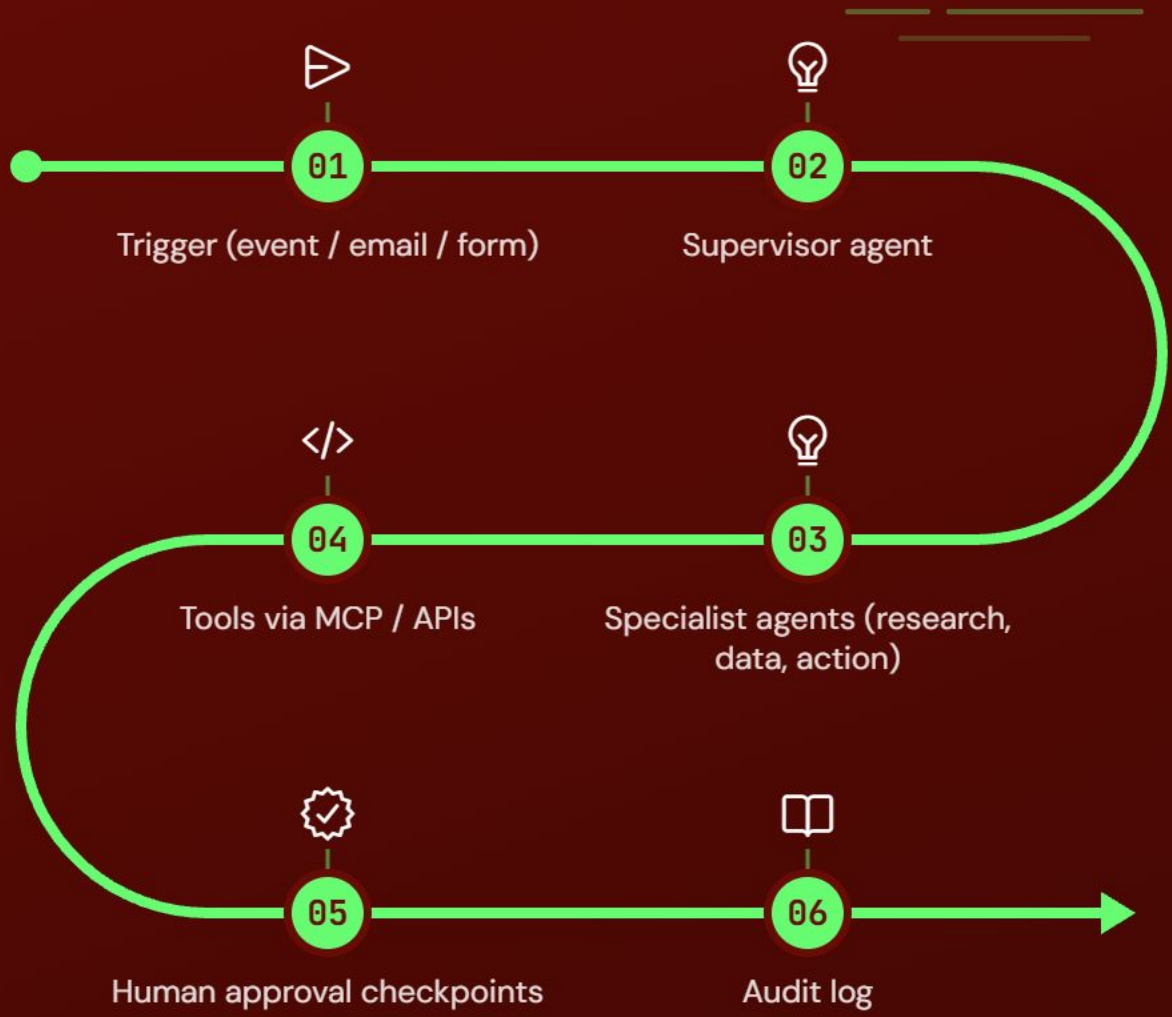

Workflow & HR Automation

Agents that run multi-step processes across people and apps.

- Agentic Workflow Orchestration (multi-agent)
- Email & Inbox Triage Agent
- Talent Acquisition / Recruiting Copilot
- Employee Onboarding Agent
- Learning & Enablement Copilot

Agentic Workflow Orchestration (multi-agent)

Multi-agent systems that plan and execute end-to-end business processes across many applications. A supervisor agent delegates to specialist agents, which use enterprise tools through APIs and MCP, with human approval at key checkpoints and a full audit log.

INTEGRATES WITH

LangGraph, Bedrock AgentCore, CrewAI, Copilot Studio, Microsoft Foundry, Gemini Enterprise, ServiceNow AI Agent Orchestrator, UiPath Maestro, n8n, Power Automate, MCP

VALUE & KPIS

- Workflows automated
- Human-touch rate
- Cost per workflow run
- End-to-end cycle time
- Task success rate
- Policy exceptions

G · WORKFLOW & HR AUTOMATION

Email & Inbox Triage Agent

An agent for shared mailboxes such as finance, customer service or operations. It classifies each email, extracts data and attachments, creates or updates cases in business systems, and drafts replies for a person to send.

INTEGRATES WITH

Outlook / Exchange (Microsoft Graph), Gmail, ServiceNow, Salesforce, Zendesk, SAP, Power Automate, UiPath, Bedrock / Azure OpenAI

VALUE & KPIS

- Handling time per email
- Classification accuracy
- SLA compliance
- Backlog size
- Cases auto-created
- Drafts sent unedited

KEY CAPABILITIES

- Intent classification and prioritisation
- Data and attachment extraction
- Case creation in ServiceNow or Salesforce
- Draft replies for one-click sending

Talent Acquisition / Recruiting Copilot

A recruiting copilot that writes job descriptions, screens and ranks résumés against required skills with clear reasoning, schedules interviews, and prepares interview kits, with checks for fair and consistent evaluation.

INTEGRATES WITH

Workday Recruiting, SAP SuccessFactors, Greenhouse, Lever, iCIMS, SmartRecruiters, LinkedIn Recruiter, HireVue, Paradox, Google / Outlook Calendar

VALUE & KPIS

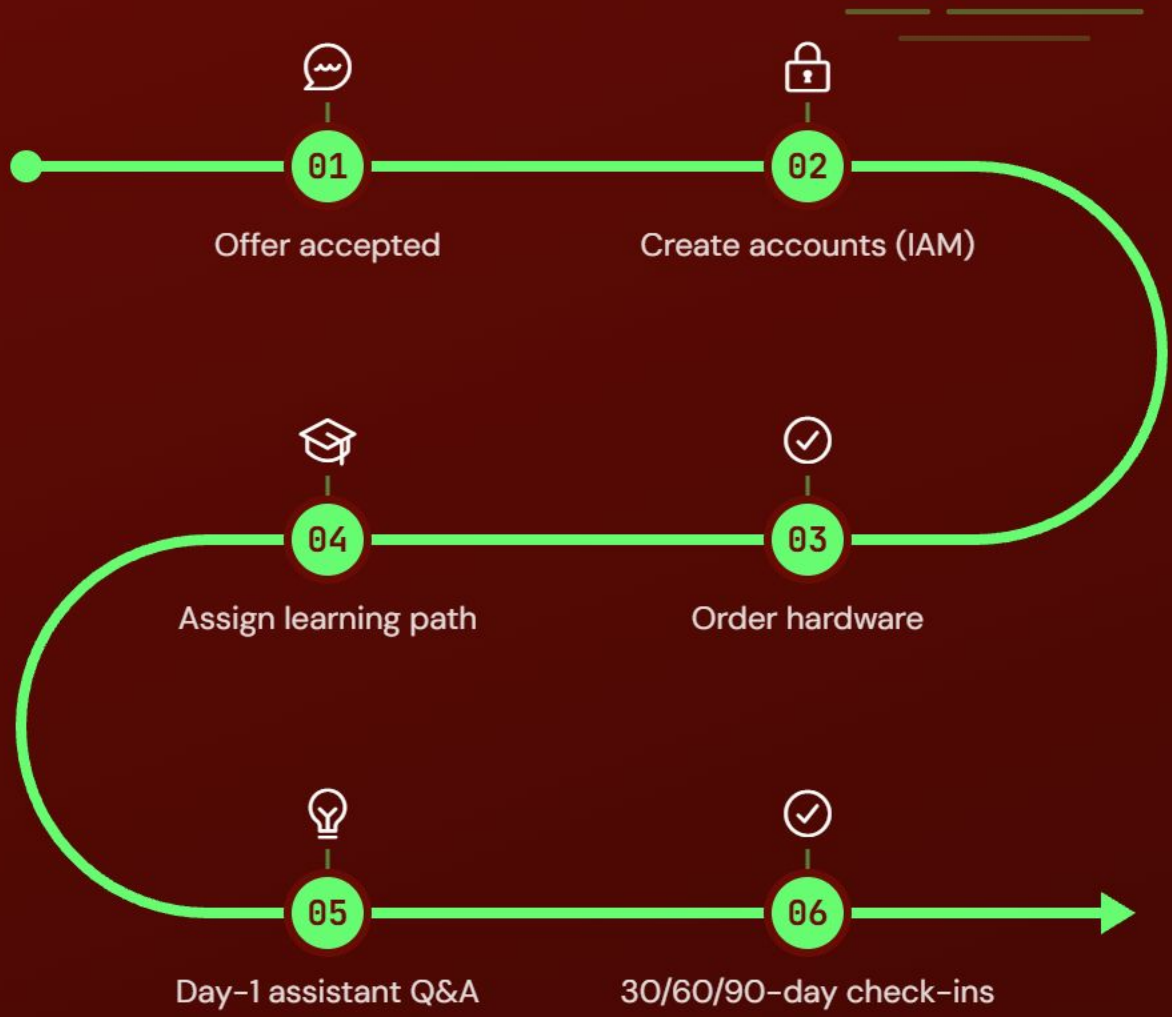

- Time to hire
- Screen-to-interview ratio
- Candidate NPS
- Recruiter hours saved
- Offer acceptance rate
- Adverse-impact checks

KEY CAPABILITIES

- Job description generation
- Résumé parsing and skills matching with reasons
- Automated interview scheduling
- Interview question kits and ATS updates

Employee Onboarding Agent

An agent that orchestrates everything a new hire needs, including accounts, equipment, training and introductions, and then answers their questions during the first weeks.

INTEGRATES WITH

Workday, SAP SuccessFactors, ServiceNow HRSD, Okta, Entra ID, Intune / Jamf, Microsoft 365 / Google Workspace, LMS, Slack, Microsoft Teams

VALUE & KPIS

- Day-1 readiness
- Onboarding tickets
- New-hire NPS
- Time to productivity
- Provisioning time
- 90-day retention

G · WORKFLOW & HR AUTOMATION

Learning & Enablement Copilot

Personalised learning that identifies skill gaps, builds learning paths, generates micro-lessons and quizzes, and lets employees practise conversations through AI role-play.

INTEGRATES WITH

Cornerstone, Degreed, Workday Learning, SuccessFactors Learning, LinkedIn Learning, Docebo, Coursera, SharePoint, Microsoft Teams, Bedrock / Foundry

VALUE & KPIS

- Course completion
- Time to proficiency
- Content creation time
- Skill-assessment uplift
- Learning hours per person
- Internal mobility

KEY CAPABILITIES

- Skill-gap analysis and learning paths
- Generated micro-lessons and quizzes
- AI role-play for sales and support practice
- Progress analytics for managers

H

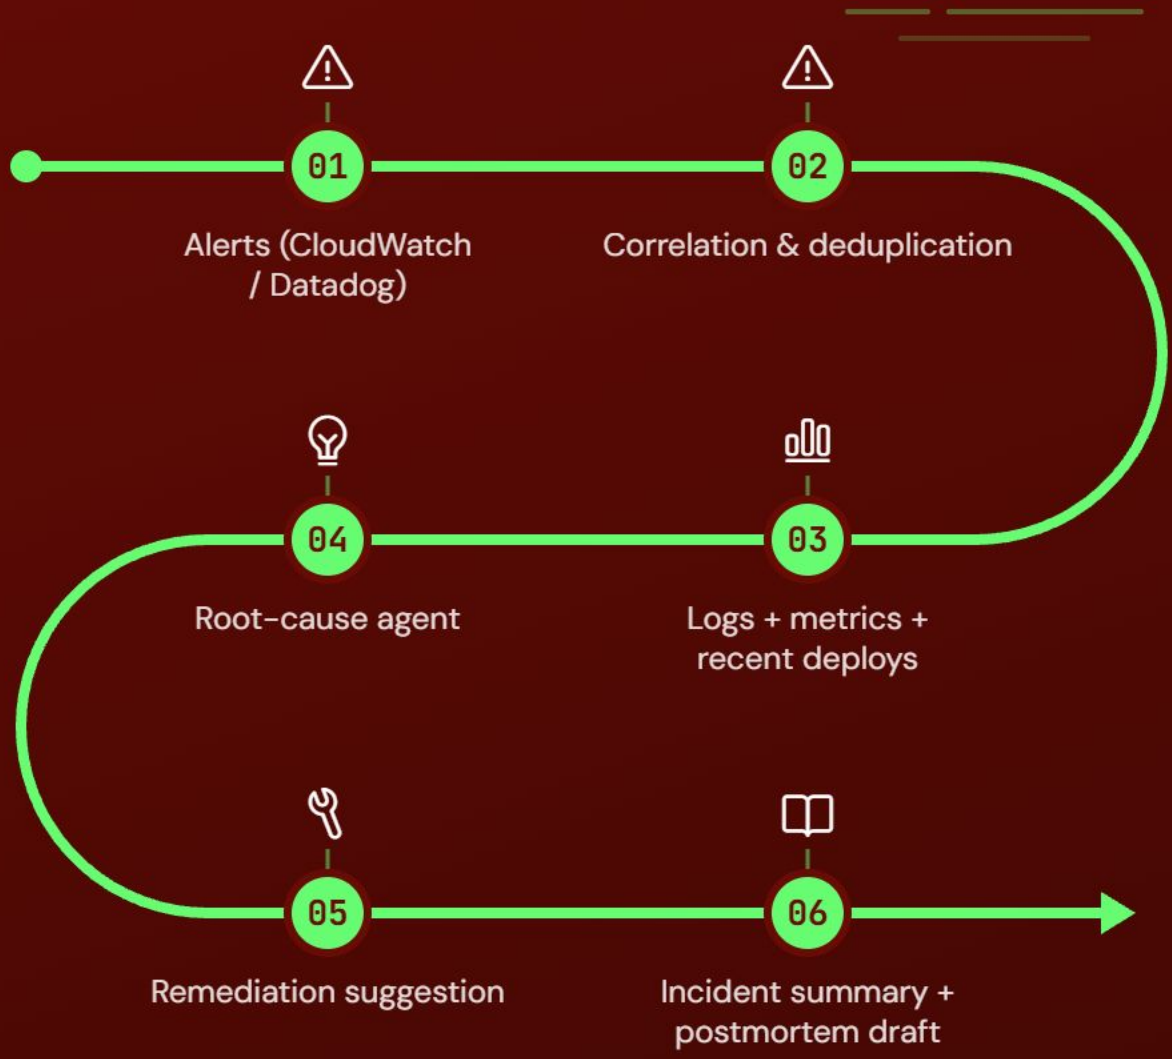

IT & Security Operations

Faster incident response, lower cloud cost, tighter security.

- AIOps Incident Response & Root Cause Analysis
- Runbook Automation Agent
- Cloud Cost & Auto-Scaling Optimisation Agent
- Security Operations (SOC) Copilot
- Identity & Access Governance Agent

AIOps Incident Response & Root Cause Analysis

AI for operations teams that correlates alerts, pulls logs, metrics and recent deployments, identifies the probable root cause, and suggests remediation. It also drafts the incident summary and postmortem.

INTEGRATES WITH

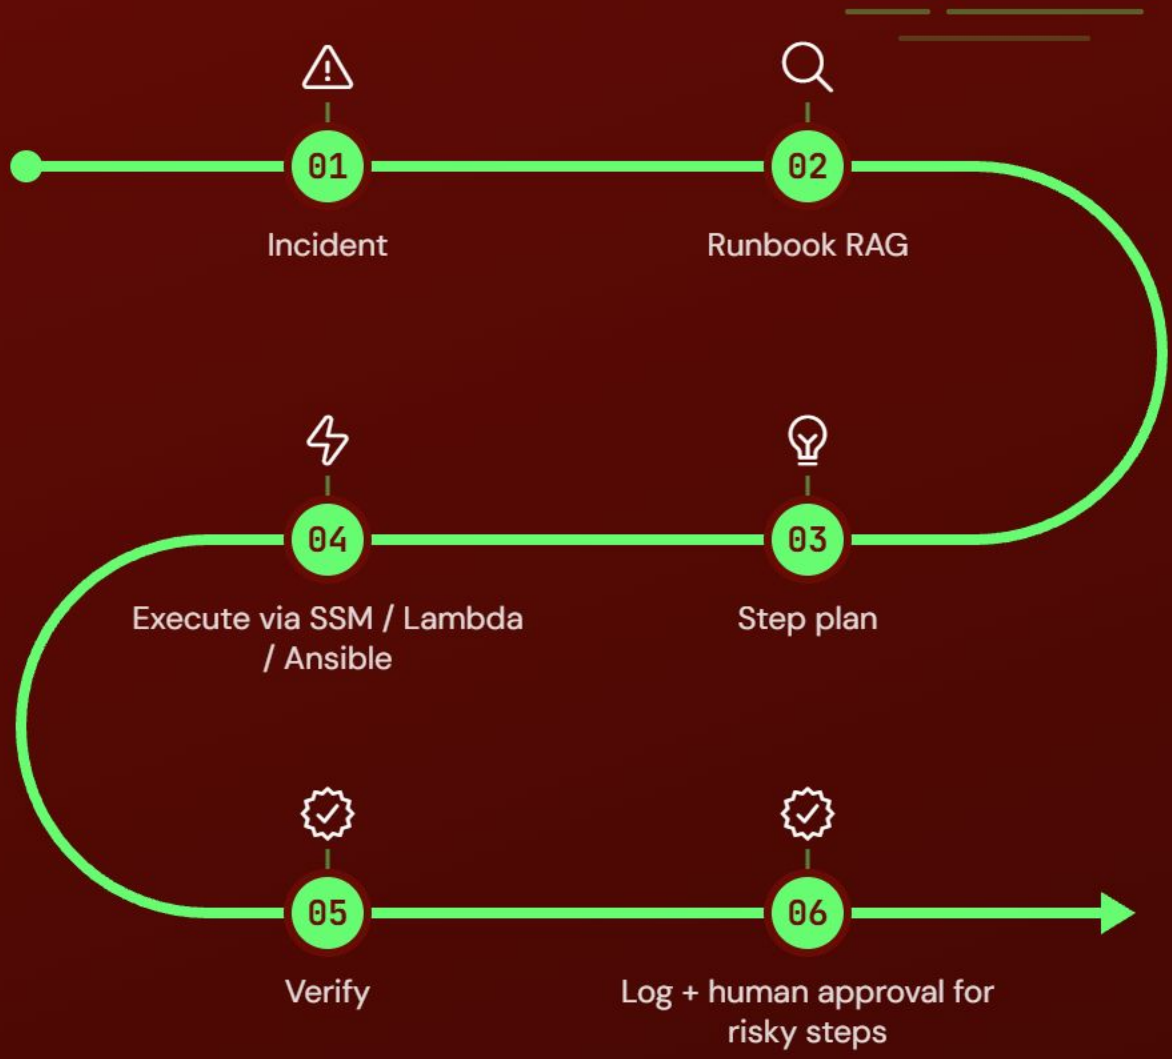

PagerDuty, Datadog, Dynatrace, New Relic, Splunk, CloudWatch, Grafana, ServiceNow ITOM, BigPanda, GitHub / GitLab deploys, Slack

VALUE & KPIS

- Mean time to detect
- Mean time to acknowledge
- Mean time to resolve
- Alert noise reduction
- Caught before users notice
- Service availability

Runbook Automation Agent

An agent that turns written runbooks into executable steps. For a known incident it retrieves the right runbook, plans the steps, runs them through automation tools, verifies the result, and asks for approval before risky actions.

INTEGRATES WITH

AWS Systems Manager, Ansible, Terraform, PagerDuty Runbook Automation (Rundeck), ServiceNow, AWS Lambda, Kubernetes, Jenkins, Slack

VALUE & KPIS

- Auto-remediated incidents
- On-call pages
- Runbook coverage
- Automated vs manual fixes
- Mean time to resolve
- Failed-automation rate

Cloud Cost & Auto-Scaling Optimisation Agent

An agent that continuously watches cloud usage and spend, finds idle or oversized resources and misconfigurations, and applies approved fixes such as rightsizing and auto-scaling changes, with a savings dashboard.

INTEGRATES WITH

AWS Cost Explorer, Compute Optimizer, Trusted Advisor, AWS Config, Azure Cost Management, Kubecost, CloudHealth, Apptio Cloudability, Terraform, CloudWatch

VALUE & KPIS

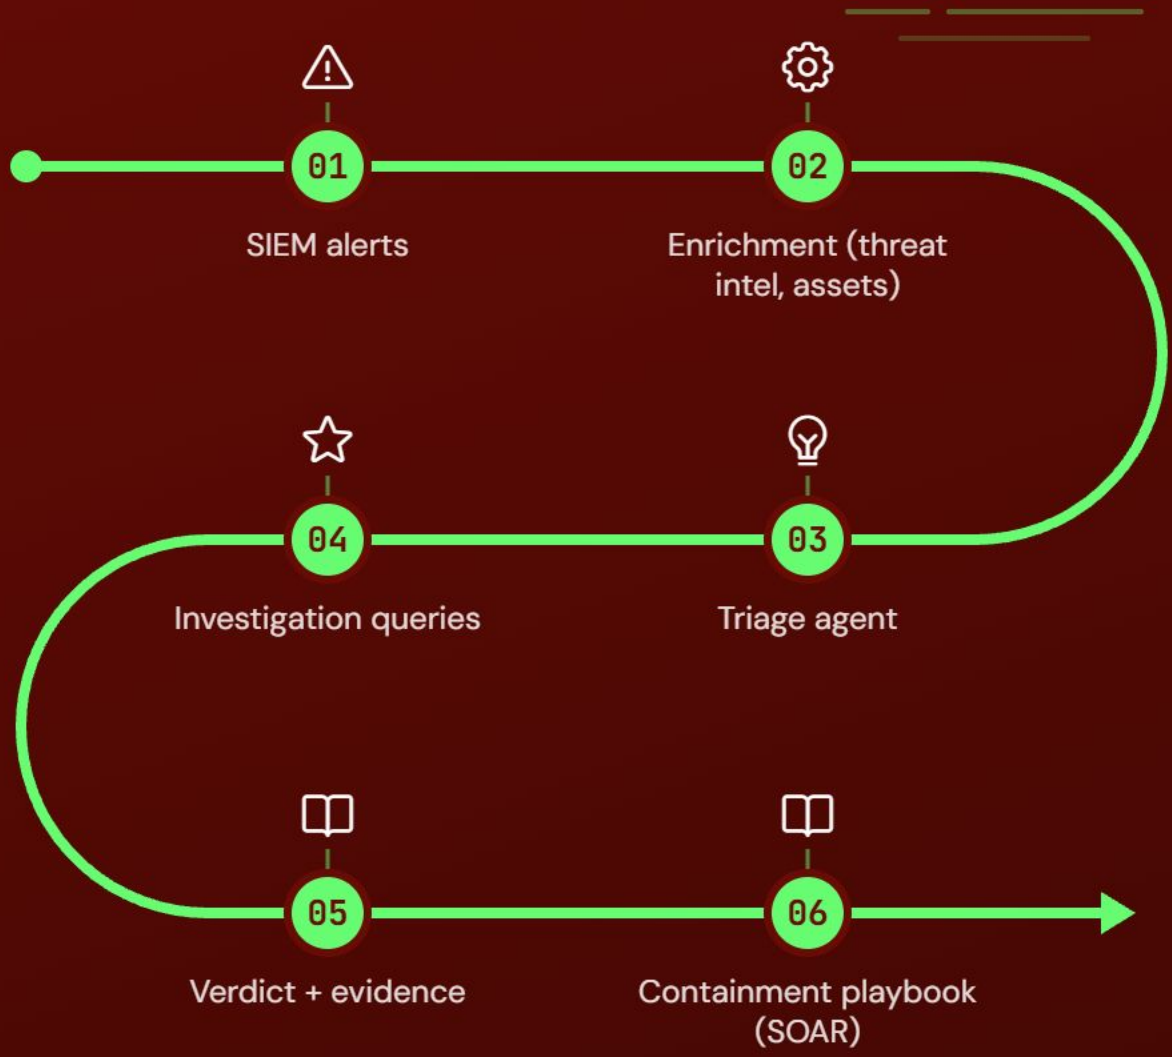

- Cloud spend saved
- Idle resources removed
- Cost per transaction
- Resource utilisation
- Savings Plan / RI coverage
- Config compliance

KEY CAPABILITIES

- Idle and oversized resource detection
- Rightsizing and auto-scaling recommendations
- Configuration and policy drift fixes
- Savings tracking and chargeback reports

Security Operations (SOC) Copilot

A copilot for security analysts that triages alerts, enriches them with threat intelligence, runs investigation queries, and recommends containment actions, with every step explained in natural language.

INTEGRATES WITH

Splunk, Microsoft Sentinel, Google Security Operations, CrowdStrike Falcon, Palo Alto Cortex XSIAM, AWS Security Hub, GuardDuty, Microsoft Security Copilot, SOAR

VALUE & KPIS

- Mean time to detect
- Mean time to respond
- Alerts per analyst
- False-positive rate
- Attacker dwell time
- Incidents auto-contained

H · IT & SECURITY OPERATIONS

Identity & Access Governance Agent

An agent that analyses who has access to what, detects unused or excessive permissions, and revokes them automatically or through a quick review, producing evidence for audits.

INTEGRATES WITH

AWS IAM Access Analyzer, IAM Identity Center, Entra ID, Okta, SailPoint, Saviynt, CyberArk, AWS CloudTrail, ServiceNow

VALUE & KPIS

- Unused permissions removed
- Access review time
- Audit findings
- Standing admin accounts
- Orphaned accounts
- Time to revoke on exit

KEY CAPABILITIES

- Permission usage analysis
- Detection of unused and risky access
- Automatic revocation or review requests
- Audit-ready compliance evidence

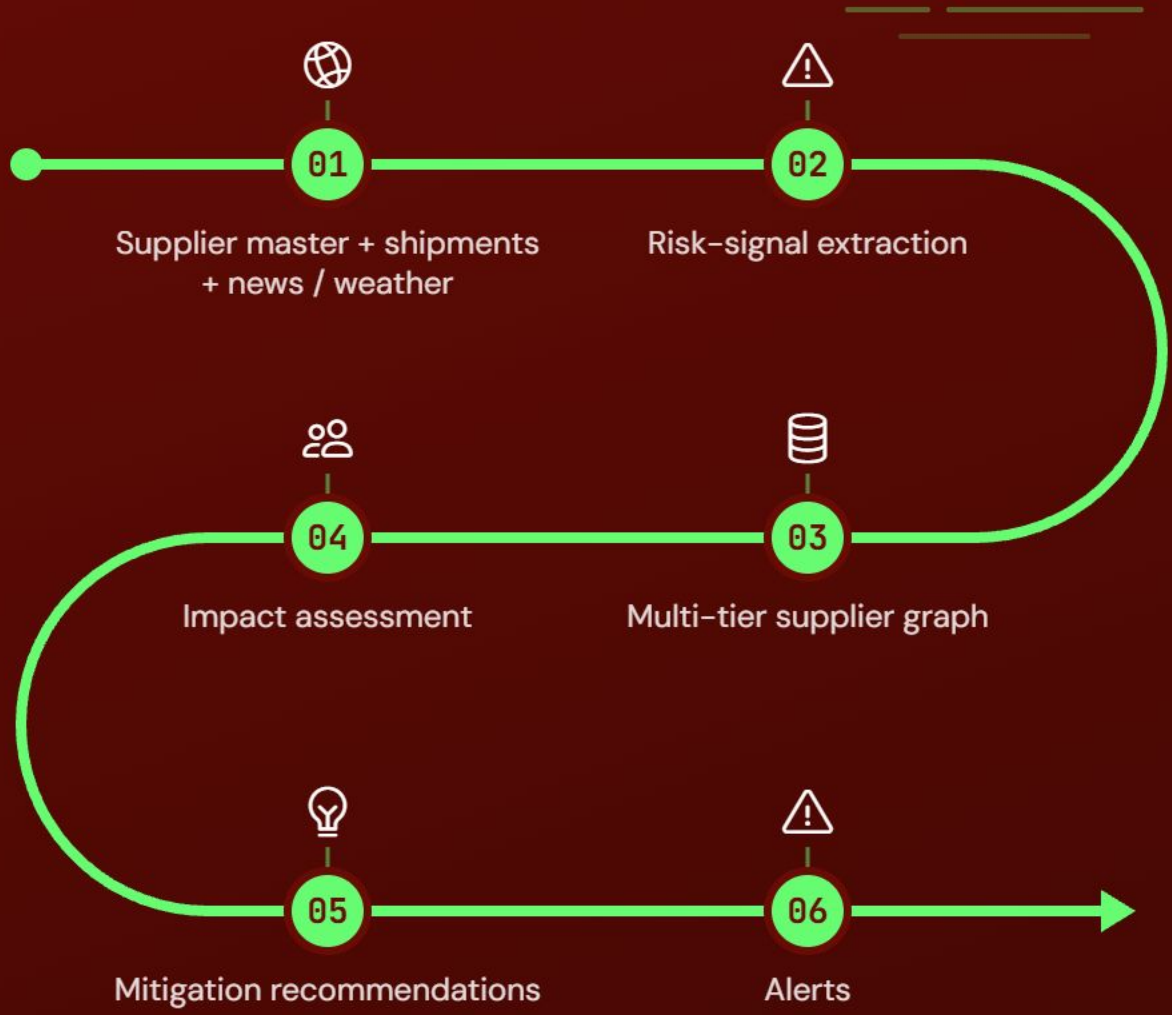

Industrial & Supply Chain Operations

Predicting, planning and optimising physical operations.

- Supply Chain Risk & Traceability Agent
- Predictive Maintenance / Asset Performance Management
- Inventory & Demand Planning Agent
- Logistics & Route Optimisation
- Visual Quality Inspection
- Field Service Technician Copilot

Supply Chain Risk & Traceability Agent

An agent that monitors suppliers, shipments, news and weather for disruption signals, maps multi-tier supplier dependencies, assesses the impact on products and revenue, and recommends mitigation actions.

INTEGRATES WITH

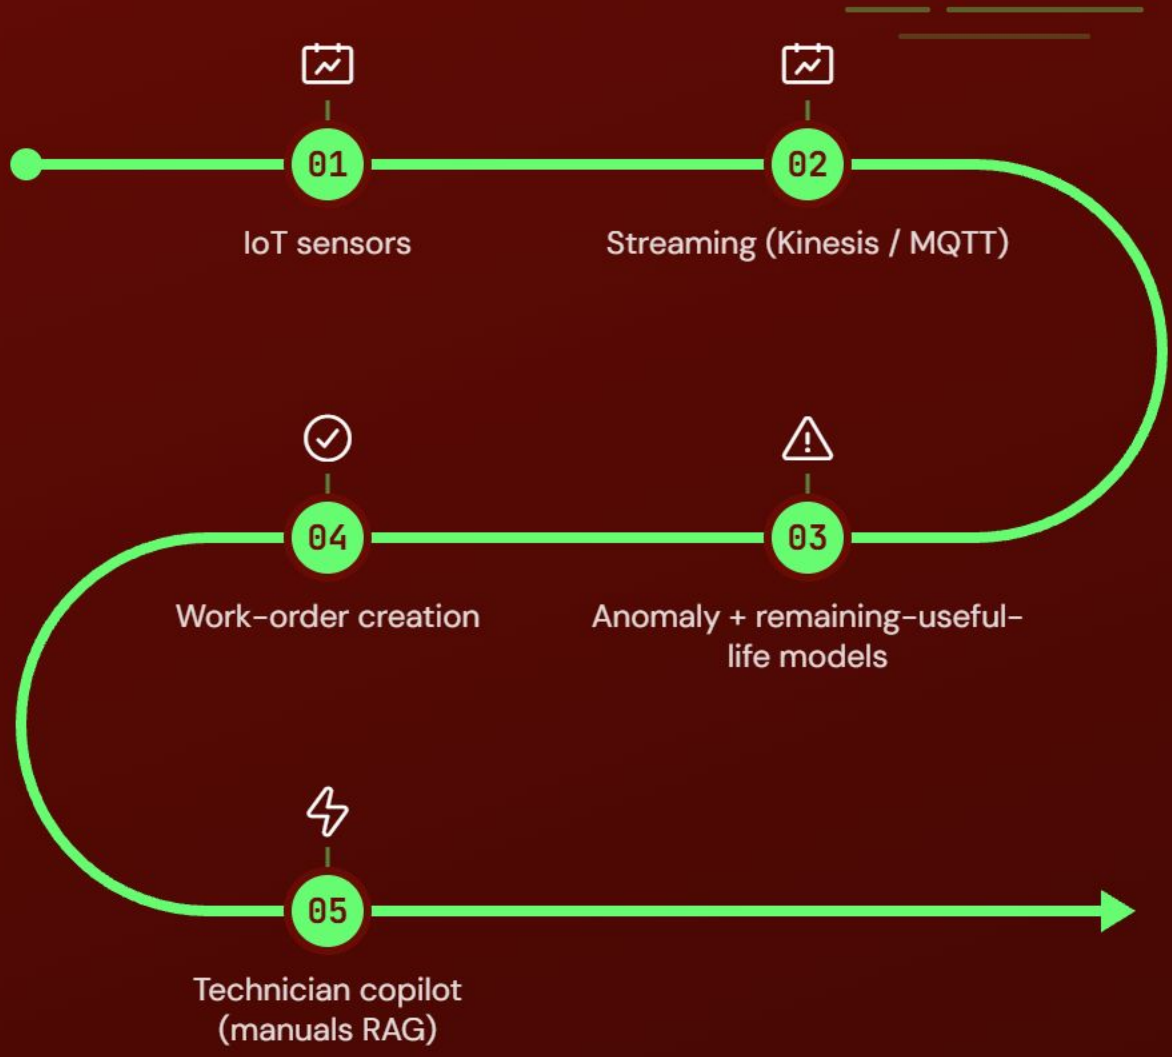

SAP IBP, Oracle SCM, Blue Yonder, Kinaxis, Resilinc, Everstream, Interos, project44, FourKites, Neo4j / ChromaDB, Bedrock

VALUE & KPIS

- Disruption lead time
- Supplier tiers mapped
- Expedite costs
- Revenue at risk
- Time to mitigate
- On-time in-full (OTIF)

Predictive Maintenance / Asset Performance Management

Predicting equipment failures before they happen using sensor data and machine learning, then creating work orders and guiding technicians with a copilot trained on equipment manuals.

INTEGRATES WITH

AWS IoT SiteWise, Azure IoT, PTC ThingWorx, AVEVA PI System, IBM Maximo, SAP PM, Kinesis, MQTT / OPC UA, SageMaker

VALUE & KPIS

- Unplanned downtime
- Maintenance cost
- OEE
- Mean time between failures
- Prediction precision
- Spare-parts inventory

Inventory & Demand Planning Agent

An agent that combines forecasts, current stock and lead times to recommend replenishment orders and stock transfers between locations, balancing service levels with inventory cost.

INTEGRATES WITH

SAP IBP, Blue Yonder, Kinaxis, o9 Solutions, Oracle SCM, Manhattan Associates, NetSuite, Databricks, Snowflake

VALUE & KPIS

- Stock-out rate
- Holding cost
- Excess / obsolete stock
- Inventory turns
- Fill rate
- Planner productivity

KEY CAPABILITIES

- Replenishment and safety-stock recommendations
- Inter-location stock rebalancing
- Planner approval workflow
- Integrated with ERP and planning tools

Logistics & Route Optimisation

AI-driven routing that plans efficient delivery routes, predicts arrival times, and handles exceptions such as delays by re-planning and notifying customers automatically.

INTEGRATES WITH

Amazon Location Service, Google Maps Platform, HERE, Oracle TMS, Manhattan TMS, Descartes, project44, FourKites, Samsara, Twilio

VALUE & KPIS

- On-time delivery
- Distance per stop
- Failed deliveries
- Cost per delivery
- ETA accuracy
- "Where is my order" calls

KEY CAPABILITIES

- Dynamic route optimisation
- ETA prediction from live traffic and GPS
- Delay detection and re-planning
- Proactive customer notifications

Visual Quality Inspection

Computer vision on the production line that detects defects in real time, rejects faulty items, and summarises defect patterns so engineers can fix root causes.

INTEGRATES WITH

Cognex, Landing AI, NVIDIA Metropolis / Jetson, AWS IoT Greengrass, Azure IoT Edge, SageMaker, Siemens Opcenter MES, PLCs, SCADA

VALUE & KPIS

- Defect escape rate
- Inspection throughput
- First-pass yield
- Scrap / rework rate
- False-reject rate
- Inspection labour cost

KEY CAPABILITIES

- Real-time defect detection at the edge
- Defect classification and auto-reject
- Defect trend analytics
- Root-cause summaries for engineers

Field Service Technician Copilot

A hands-free assistant for field technicians that identifies equipment from a photo or voice, retrieves manuals and service history, guides the repair step by step, and writes the service report.

INTEGRATES WITH

Salesforce Field Service, ServiceNow FSM, Dynamics 365 Field Service, IFS, IBM Maximo, SAP Field Service Management, Microsoft Teams, mobile apps, parts ERP

VALUE & KPIS

- First-time fix rate
- Mean time to repair
- Report completion time
- Repeat visits
- Jobs per technician-day
- Customer CSAT

KEY CAPABILITIES

- Equipment identification from photo or voice
- Guided repair steps from manuals
- Parts lookup and ordering
- Automatic service reports

Data Engineering & Management

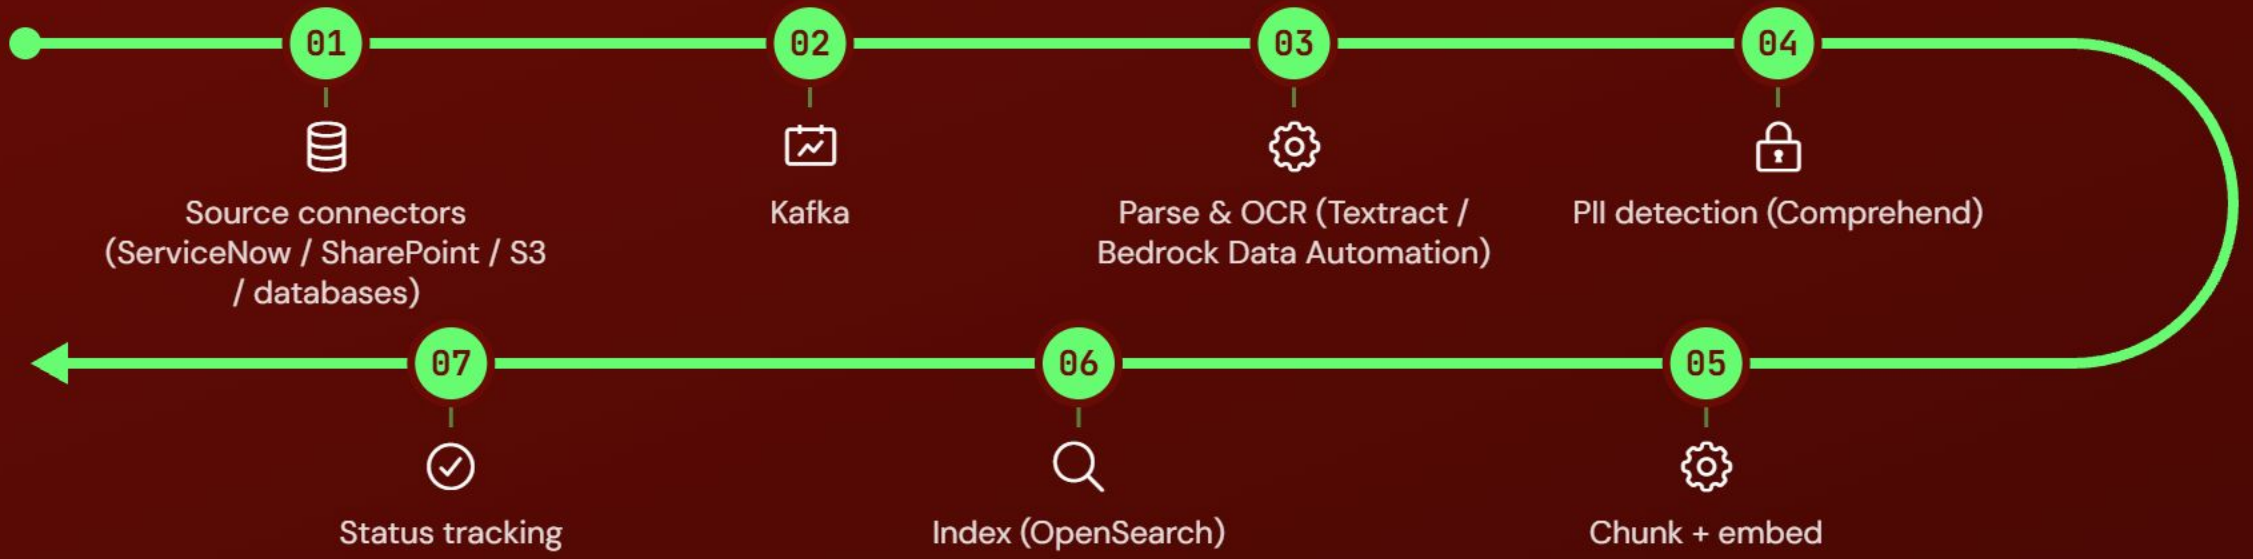

The data foundation that makes every AI solution work.

- Unstructured Data Ingestion & Knowledge Pipeline
- Change Data Capture & Continuous Source Sync
- Real-Time Streaming Ingestion with AI Enrichment
- AI-Assisted Pipeline / ETL Generation
- Multi-System Data Reconciliation & Synchronisation
- Data Quality Monitoring & Data Observability Agent
- Self-Healing Pipelines / DataOps Agent
- Data Catalogue, Metadata & Lineage Automation
- Master Data Management & Entity Resolution
- Data Warehouse Migration to Lakehouse / Cloud
- Data Privacy: PII Discovery, Masking & Synthetic Data
- Vector Index & Embedding Lifecycle Management
- Data Lifecycle, Retention & Archival
- Web & External Data Acquisition
- Semantic Layer & AI-Ready Data Products

J · DATA ENGINEERING & MANAGEMENT

Unstructured Data Ingestion & Knowledge Pipeline

A configurable ingestion framework that turns raw documents into AI-ready knowledge. It connects to source systems, parses and OCRs files, detects PII, chunks and embeds content, and indexes it for retrieval, with status tracking for every document.

INTEGRATES WITH

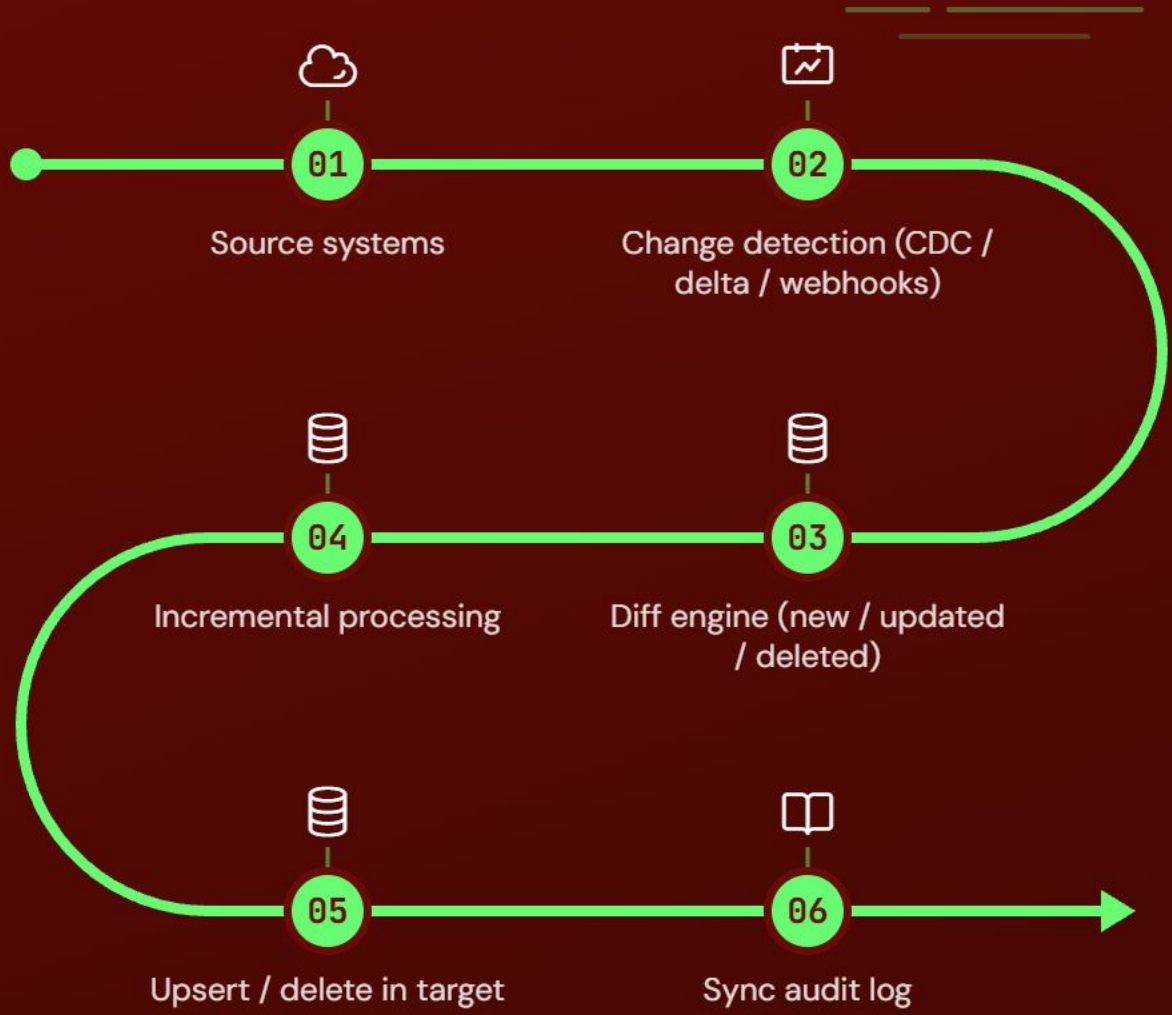

ServiceNow, SharePoint, Confluence, S3, Box, Kafka / Amazon MSK, Textract, Bedrock Data Automation, Comprehend, Unstructured.io, OpenSearch, pgvector

VALUE & KPIS

- Documents per hour
- Index freshness (lag)
- PII leakage incidents
- Ingestion success rate
- Throttling errors
- Cost per 1,000 pages

Change Data Capture & Continuous Source Sync

Continuous synchronisation that detects new, updated and deleted records or files in source systems and applies only the changes downstream, so warehouses and AI knowledge bases never go stale.

INTEGRATES WITH

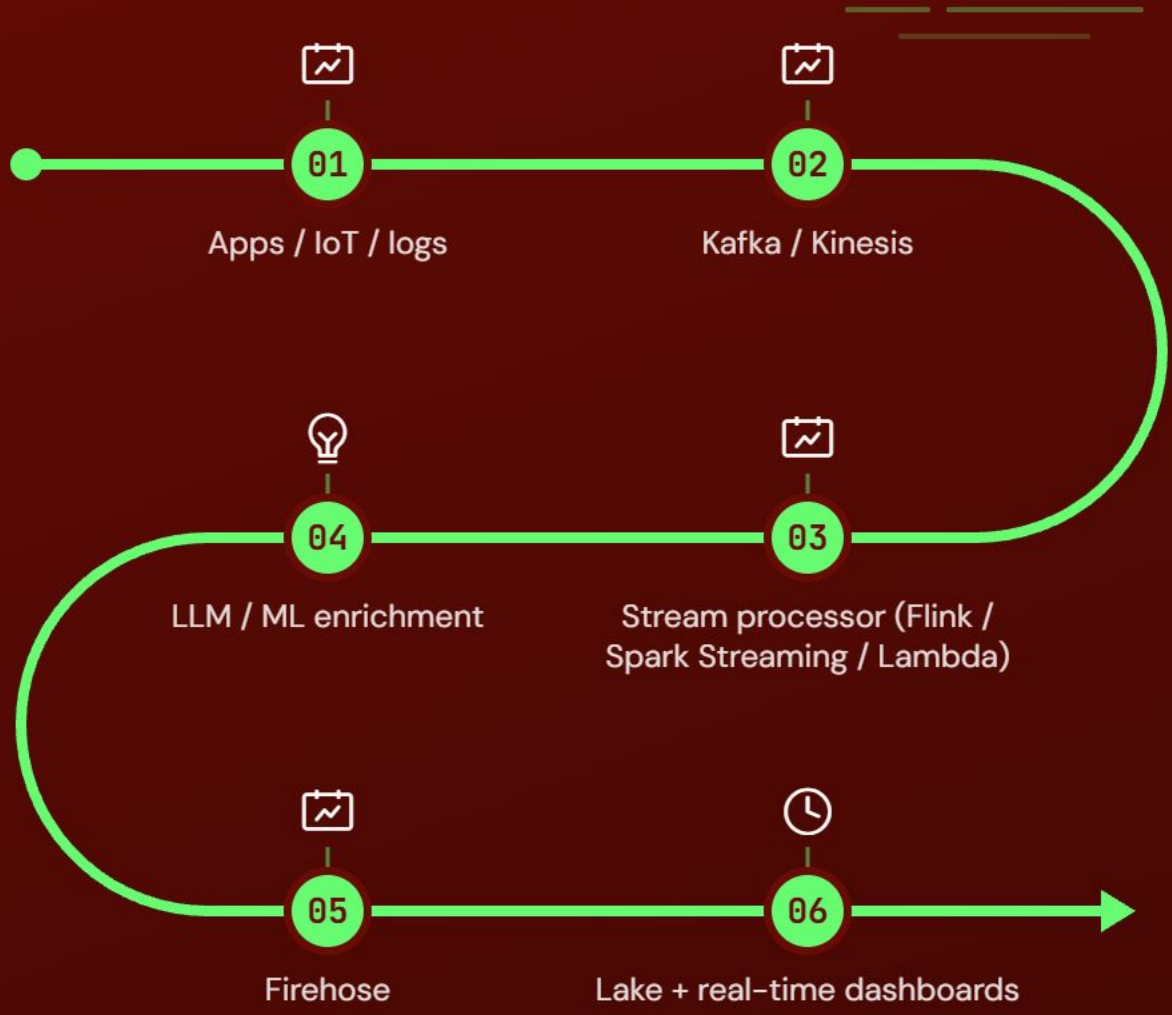

Debezium, AWS DMS, Fivetran, Qlik Replicate, Oracle GoldenGate, Kafka Connect, Databricks Lakeflow Connect, ServiceNow & SharePoint APIs, Bedrock KB sync

VALUE & KPIS

- Replication lag
- Missed / duplicate changes
- Sync failures
- Freshness SLA met
- Full reloads avoided
- Compute cost

Real-Time Streaming Ingestion with AI Enrichment

Streaming pipelines that ingest events from applications, devices and logs, and enrich them in flight with classification, entity extraction or sentiment before they reach the data lake and live dashboards.

INTEGRATES WITH

Amazon Kinesis, Amazon MSK, Confluent Cloud, Apache Flink, Spark Structured Streaming, AWS Lambda, Firehose, Databricks, Snowpipe Streaming, OpenSearch

VALUE & KPIS

- End-to-end latency
- Enrichment accuracy
- Data loss / duplicates
- Events per second
- Consumer lag
- Cost per million events

AI-Assisted Pipeline / ETL Generation

Engineers describe the pipeline they need in plain language, and AI discovers the source schemas and generates Spark, SQL or Airflow code with data tests, ready for review and deployment.

INTEGRATES WITH

Databricks Assistant, Snowflake Cortex, dbt Copilot, Airflow, AWS Glue, Matillion, GitHub Copilot, Claude Code, Kiro

VALUE & KPIS

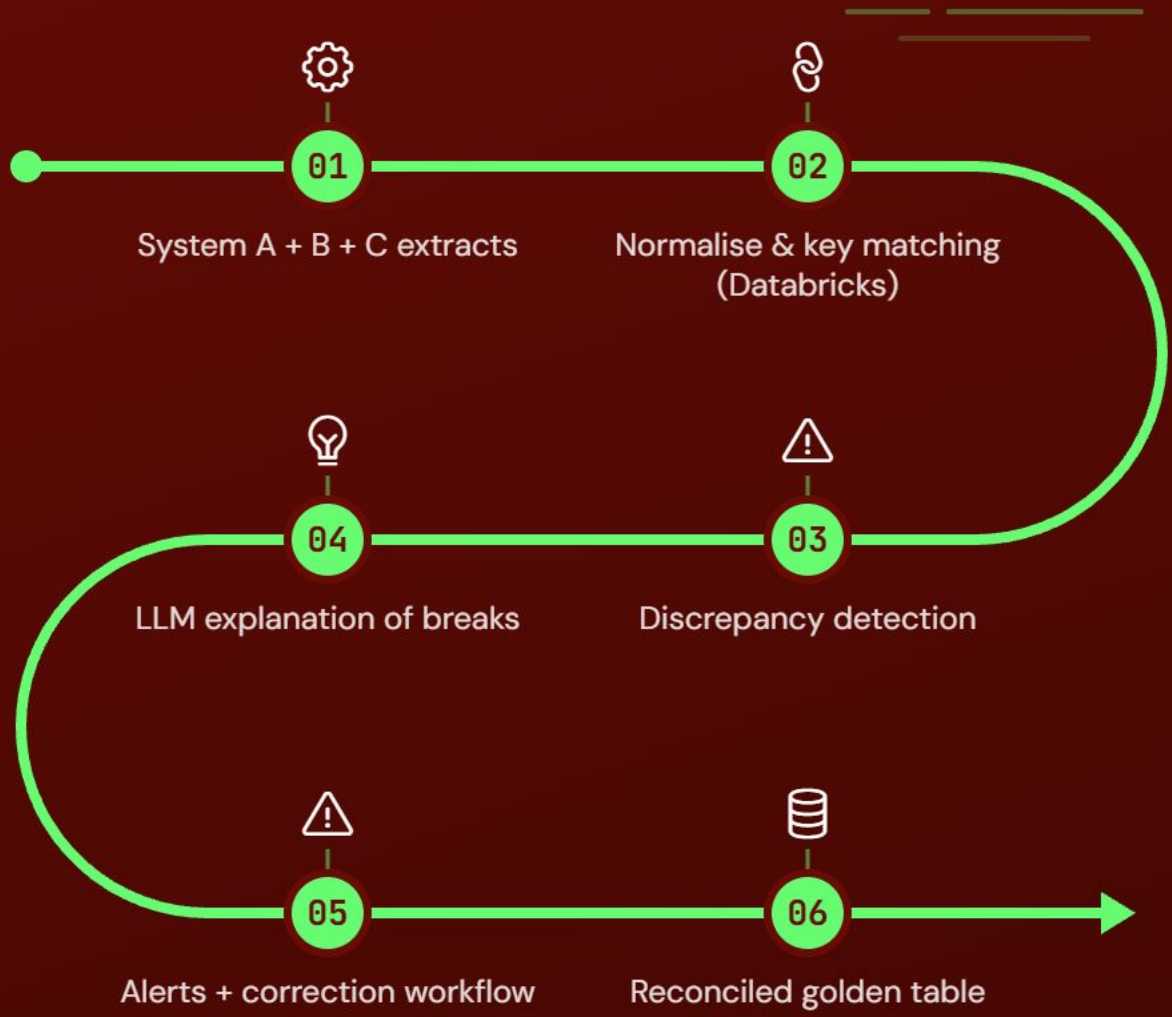

- Pipeline delivery time
- Test coverage
- Engineer hours saved
- Generated code accepted
- Data incidents
- Data-request backlog

KEY CAPABILITIES

- Pipeline code generated from requirements
- Automatic schema discovery and mapping
- Data tests generated with the code
- Faster delivery of new data sources

Multi-System Data Reconciliation & Synchronisation

Automated comparison of records across operational systems to find mismatches, explain why they differ, and drive corrections, producing a trusted, reconciled dataset.

INTEGRATES WITH

Databricks, Delta Lake, Snowflake, Airflow, Great Expectations, Datafold, ServiceNow, Slack / email alerts, source system APIs

VALUE & KPIS

- Mismatch rate
- Records auto-reconciled
- Data-trust score
- Time to resolve breaks
- Manual checks removed
- Downstream incidents

J · DATA ENGINEERING & MANAGEMENT

Data Quality Monitoring & Data Observability Agent

Continuous monitoring of data freshness, volume, schema and validity across pipelines and tables. When something breaks, the agent traces the cause through lineage and suggests a fix before business users are affected.

INTEGRATES WITH

Monte Carlo, Bigeye, Acceldata, Sifflet, Anomalo, Soda, Great Expectations, Databricks Lakehouse Monitoring, AWS Glue Data Quality, dbt tests

VALUE & KPIS

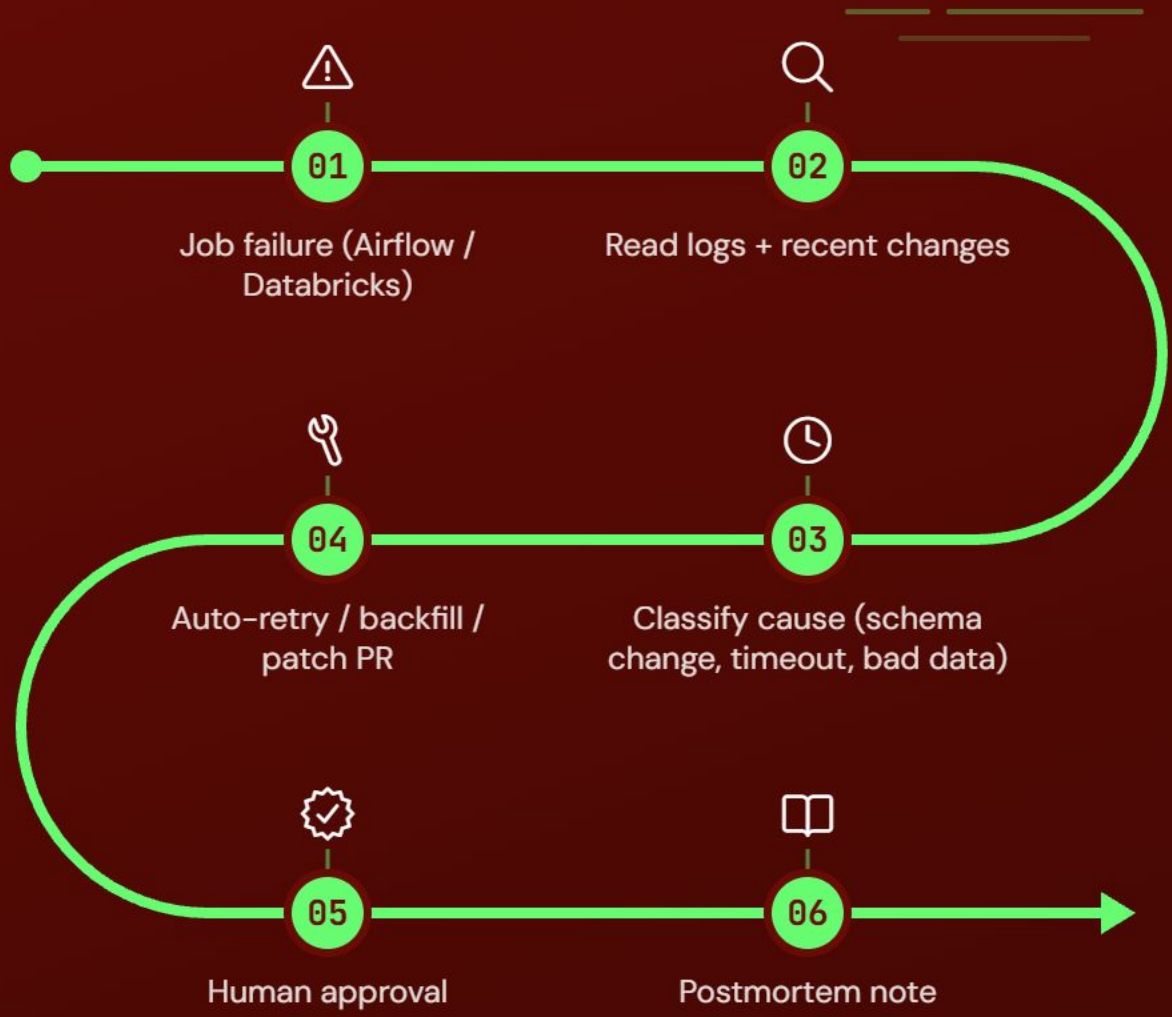

- Data downtime
- Time to resolve
- Tables monitored
- Time to detect
- Caught before consumers
- Quality rule coverage

KEY CAPABILITIES

- Freshness, volume and schema-drift monitoring
- LLM-suggested quality rules
- Root cause traced through lineage
- Alerts and incident tracking

Self-Healing Pipelines / DataOps Agent

An agent that diagnoses failed data jobs by reading logs and recent changes, then retries, backfills or proposes a code fix, escalating to engineers only when necessary.

INTEGRATES WITH

Airflow / Astronomer, Databricks Workflows, Dagster, AWS Step Functions, GitHub, PagerDuty, Slack, Bedrock / Claude agents

VALUE & KPIS

- Pipeline MTTR
- On-call hours
- Backfill time
- Auto-recovered failures
- SLA breaches
- Repeat failures

J · DATA ENGINEERING & MANAGEMENT

Data Catalogue, Metadata & Lineage Automation

Automatic documentation of every dataset with business-friendly descriptions, glossary terms, sensitivity tags and lineage, so people can find and trust data, and AI agents can use it correctly.

INTEGRATES WITH

Unity Catalog, AWS Glue Data Catalog, SageMaker Catalog (DataZone), Microsoft Purview, Collibra, Alation, Atlan, OpenMetadata, dbt docs

VALUE & KPIS

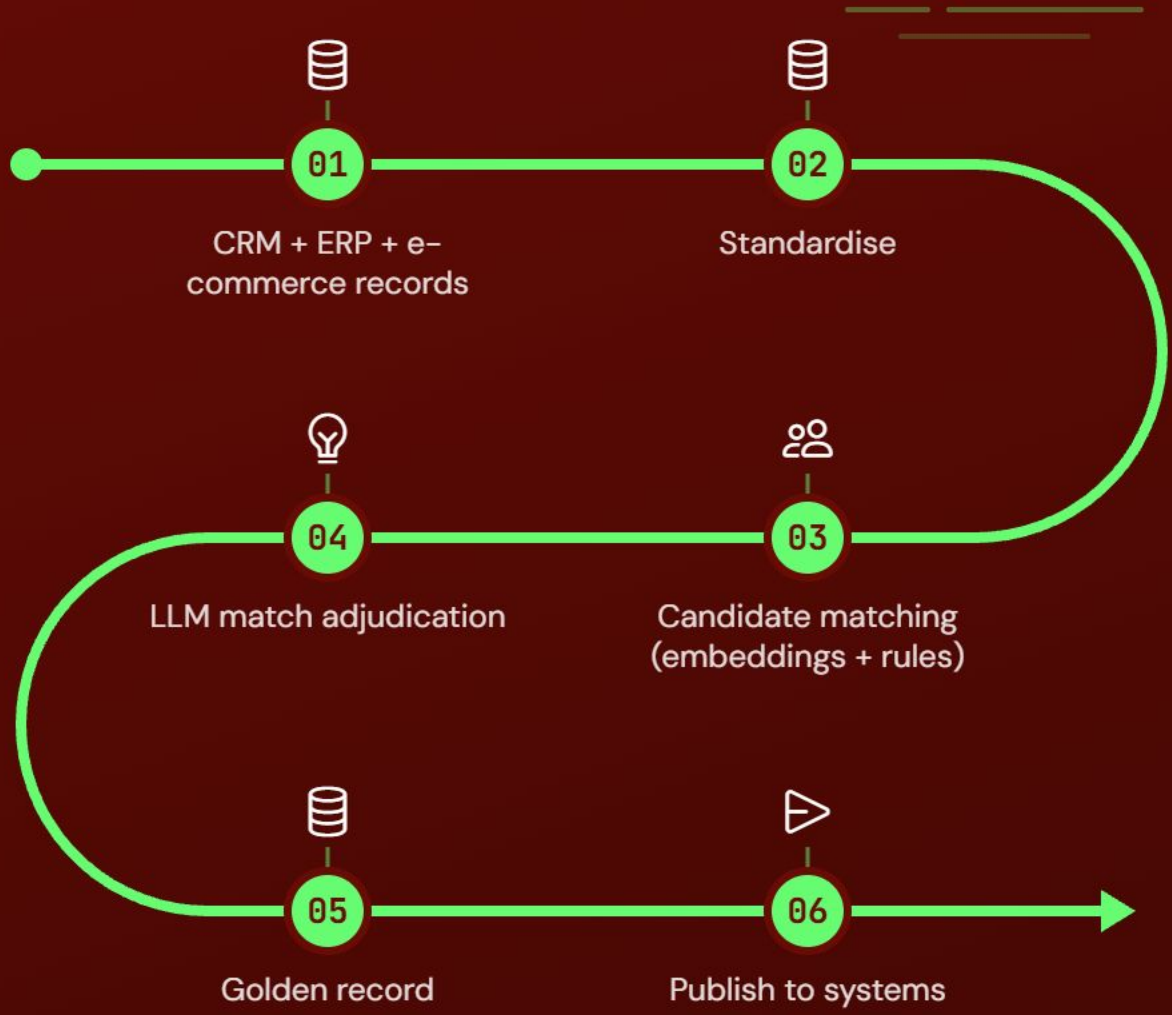

- Documented-asset coverage
- PII tagging coverage
- Lineage coverage
- Time to find data
- Catalogue weekly users
- Duplicate datasets retired

KEY CAPABILITIES

- LLM-generated dataset and column descriptions
- Business glossary mapping
- PII and sensitivity tagging
- Lineage graphs and catalogue chat search

Master Data Management & Entity Resolution

Unifying duplicate customer, product and supplier records from many systems into one golden record, using embeddings and rules to find candidate matches and LLMs to decide difficult cases.

INTEGRATES WITH

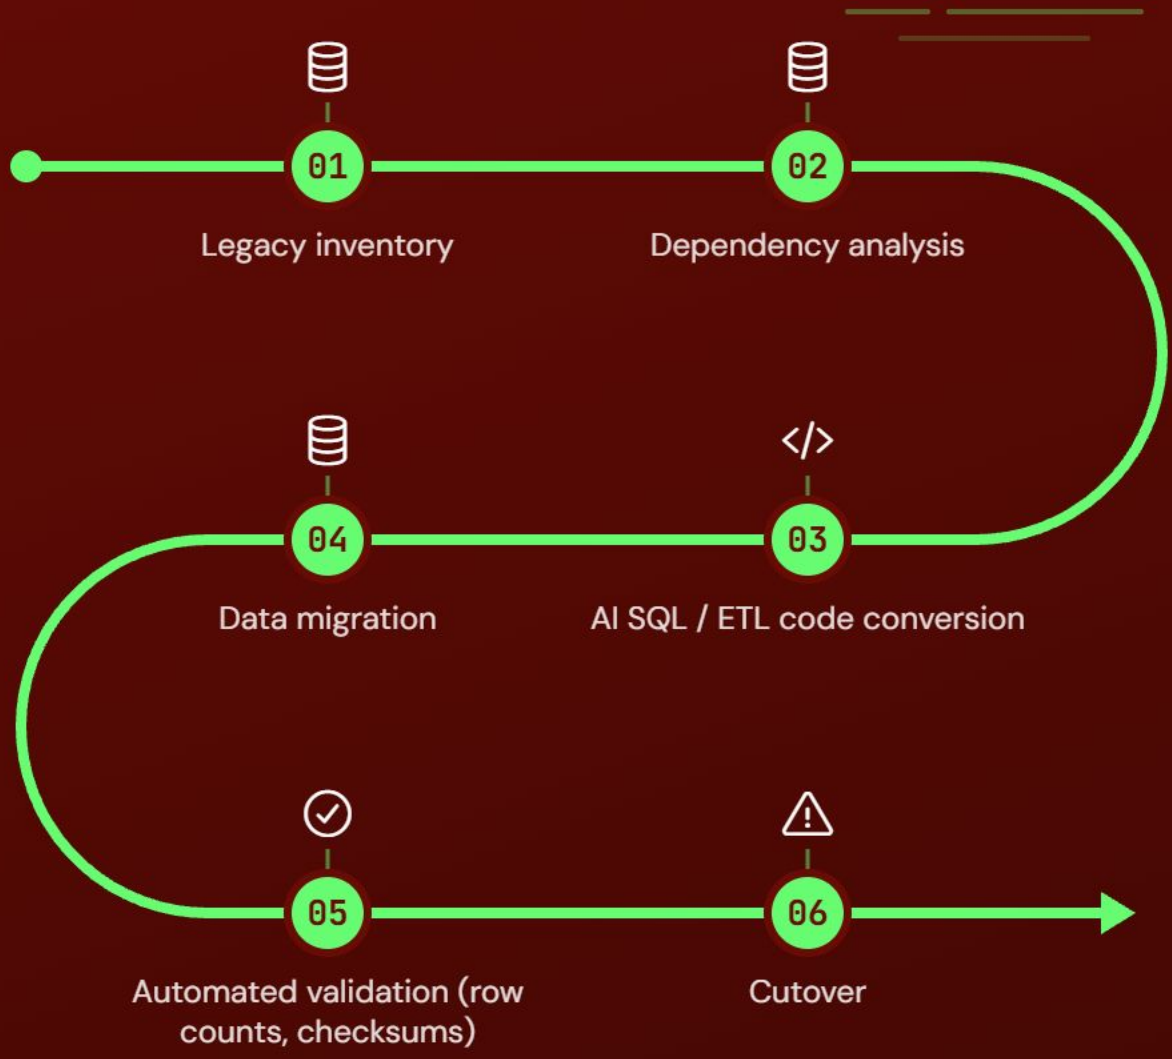

Informatica MDM (IDMC), Reltio, Profisee, Semarchy, Tamr, AWS Entity Resolution, Databricks, Salesforce, SAP MDG

VALUE & KPIS

- Duplicate rate
- Golden-record coverage
- Source onboarding time
- Match precision / recall
- Steward backlog
- Single-customer-view use

Data Warehouse Migration to Lakehouse / Cloud

AI-assisted migration of legacy data warehouses and ETL tools to a modern lakehouse or cloud warehouse, including automated code conversion and validation that the migrated data matches the source.

INTEGRATES WITH

Databricks Lakebridge, Snowflake SnowConvert AI, Amazon Redshift, BigQuery, AWS DMS / SCT, AWS Transform, Azure Migrate, Datafold, Teradata, Informatica, SSIS

VALUE & KPIS

- Code conversion rate
- Validation pass rate
- Query performance
- Migration timeline
- Licence savings
- Cutover incidents

Data Privacy: PII Discovery, Masking & Synthetic Data

Finding and protecting sensitive data across data stores before it reaches AI models or test environments, through discovery, classification, masking and realistic synthetic data.

INTEGRATES WITH

Amazon Macie, Comprehend, Lake Formation, Microsoft Purview, BigID, Immuta, Privacera, Protegrity, Gretel, Tonic.ai, SDV

VALUE & KPIS

- Sensitive data discovered
- Masked non-prod datasets
- DSAR response time
- Exposure incidents
- Access-request time
- GDPR / DPDP findings

KEY CAPABILITIES

- PII and PHI discovery across data stores
- Masking, tokenisation and anonymisation
- Synthetic data for testing and AI training
- Fine-grained access policies

Vector Index & Embedding Lifecycle Management

Ongoing maintenance of the vector indexes behind AI assistants: removing stale or duplicate chunks, re-embedding when models change, compacting indexes, and re-testing retrieval quality.

INTEGRATES WITH

OpenSearch, pgvector, Pinecone, Weaviate, Milvus, Redis, FAISS, Amazon S3 Vectors, Bedrock / Cohere / OpenAI embeddings, RAGAS

VALUE & KPIS

- Retrieval recall@k
- Duplicate ratio
- Re-embedding time
- Stale chunk ratio
- Index storage cost
- Query latency (p95)

KEY CAPABILITIES

- Stale and duplicate chunk clean-up
- Re-embedding on model upgrades
- Index compaction and cost control
- Retrieval quality regression tests

Data Lifecycle, Retention & Archival

Automated management of data from creation to deletion: tiering to cheaper storage, applying retention rules by regulation, handling legal holds, and producing audit evidence.

INTEGRATES WITH

S3 Lifecycle, S3 Glacier, Azure Blob tiers, Microsoft Purview, Delta Lake VACUUM / OPTIMIZE, Snowflake Time Travel, Commvault, Veritas, ServiceNow

VALUE & KPIS

- Storage cost per TB
- Legal-hold compliance
- Restore time
- Data under retention policy
- Defensible deletions
- Audit findings

KEY CAPABILITIES

- Usage- and age-based storage tiering
- Regulation-driven retention rules
- Legal hold and defensible deletion
- Storage cost and compliance reporting

J · DATA ENGINEERING & MANAGEMENT

Web & External Data Acquisition

Configurable collection of external data from websites and APIs, without code for each source. LLMs turn unstructured pages into structured records, with change detection and validation.

INTEGRATES WITH

Scrapy, Playwright, Apify, Bright Data, Firecrawl, Airflow, AWS Lambda, S3, Bedrock / Claude extraction

VALUE & KPIS

- Sources onboarded
- Data freshness
- Cost per record
- Extraction accuracy
- Scraper breakage rate
- Research hours replaced

KEY CAPABILITIES

- No-code source configuration
- Scheduled scraping and API ingestion
- LLM-based structured extraction
- Change detection and validation

Semantic Layer & AI-Ready Data Products

A governed layer of business metrics, definitions and data products that BI tools and AI agents query consistently, so ‘revenue’ means the same thing in every dashboard and every AI answer.

INTEGRATES WITH

Power BI semantic models, dbt Semantic Layer (MetricFlow), Databricks Metric Views, Snowflake Semantic Views, Cube, AtScale, Looker LookML, MCP

VALUE & KPIS

- Metric consistency
- Time to new metric
- Data product reuse
- Governed metrics
- AI answers on governed data
- BI / AI query accuracy

KEY CAPABILITIES

- Shared metric and business definitions
- Governed access policies
- Exposed via SQL, API and MCP
- Consistent answers across BI and AI copilots

AI Platform & Governance

The enablers that take AI from pilot to governed production.

- Enterprise AI Platform / LLMOps
- AI Gateway, Model Routing & Cost Optimisation
- Guardrails & Responsible AI
- LLM Evaluation & Observability
- Agent Memory & Personalisation Layer
- MCP Tool Integration Hub
- AI Adoption Roadmap: Pilot to Production

K · AI PLATFORM & GOVERNANCE

Enterprise AI Platform / LLMOps

A shared internal platform that gives every team approved models, reusable agent and prompt templates, deployment pipelines and monitoring, so new AI use cases ship in weeks instead of months.

INTEGRATES WITH

Amazon Bedrock & AgentCore, Microsoft Foundry, Google Vertex AI, Databricks Mosaic AI, MLflow, SageMaker, GitHub Actions, Kubernetes, Terraform

VALUE & KPIS

- Time to production
- Teams onboarded
- Platform cost per app
- Reusable components
- Deployment frequency
- Incidents per release

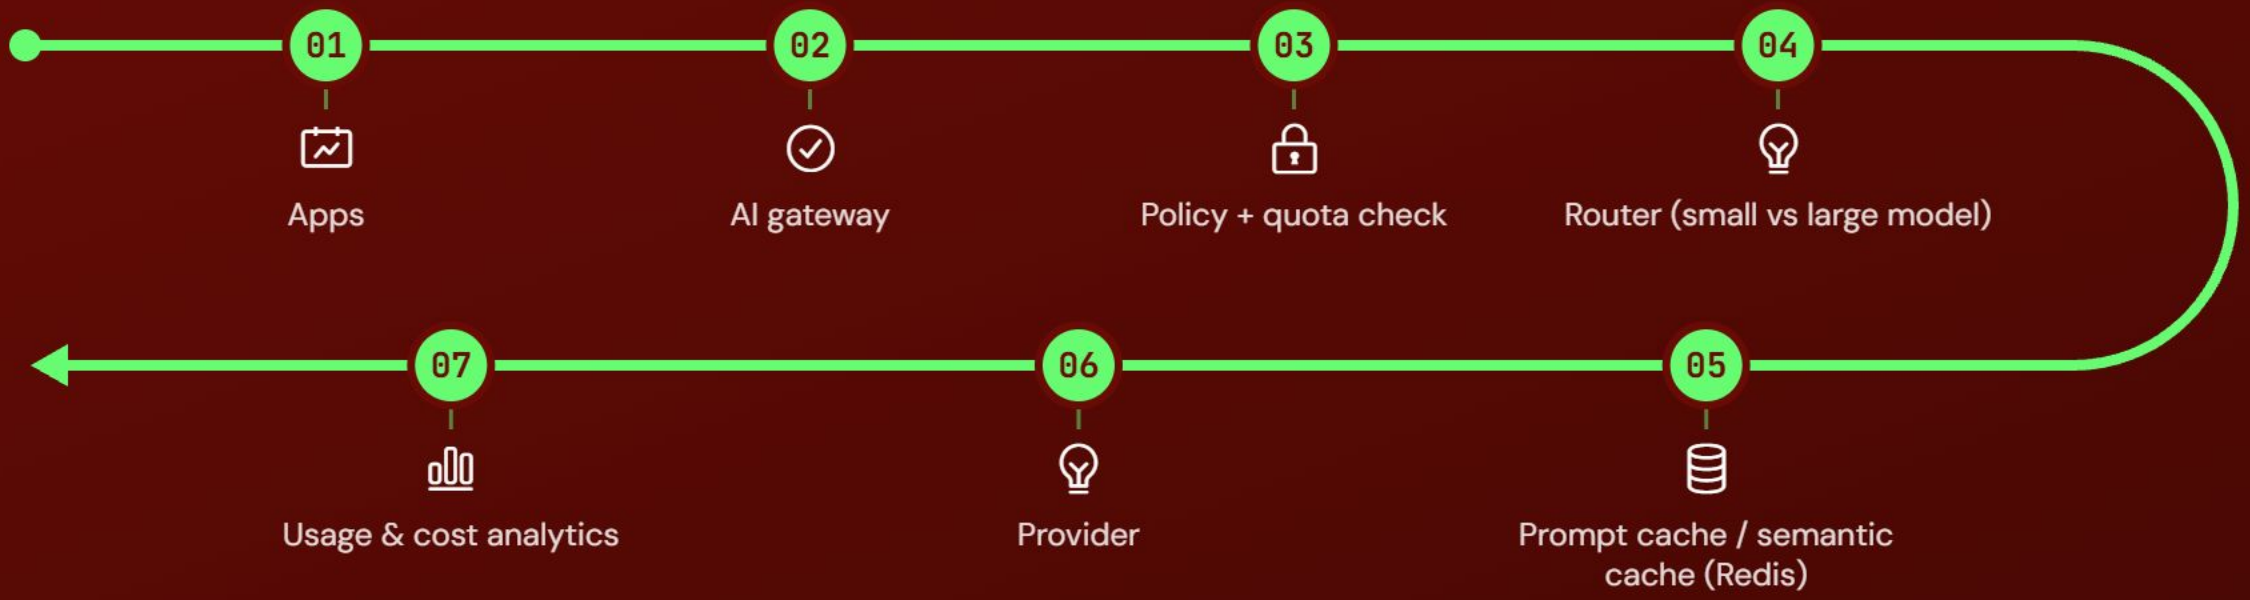

KEY CAPABILITIES

- Approved model catalogue
- Prompt and agent registry with versioning
- CI/CD and deployment for AI apps
- Central monitoring and feedback loops

K · AI PLATFORM & GOVERNANCE

AI Gateway, Model Routing & Cost Optimisation

A single gateway for every LLM call in the company. It enforces policies and quotas, routes each request to the most cost-effective model, caches repeated prompts, and reports usage and cost per team.

INTEGRATES WITH

LiteLLM, Portkey, Kong AI Gateway, TrueFoundry, Cloudflare AI Gateway, Azure API Management, Bedrock, Azure OpenAI, Anthropic API, Redis semantic cache

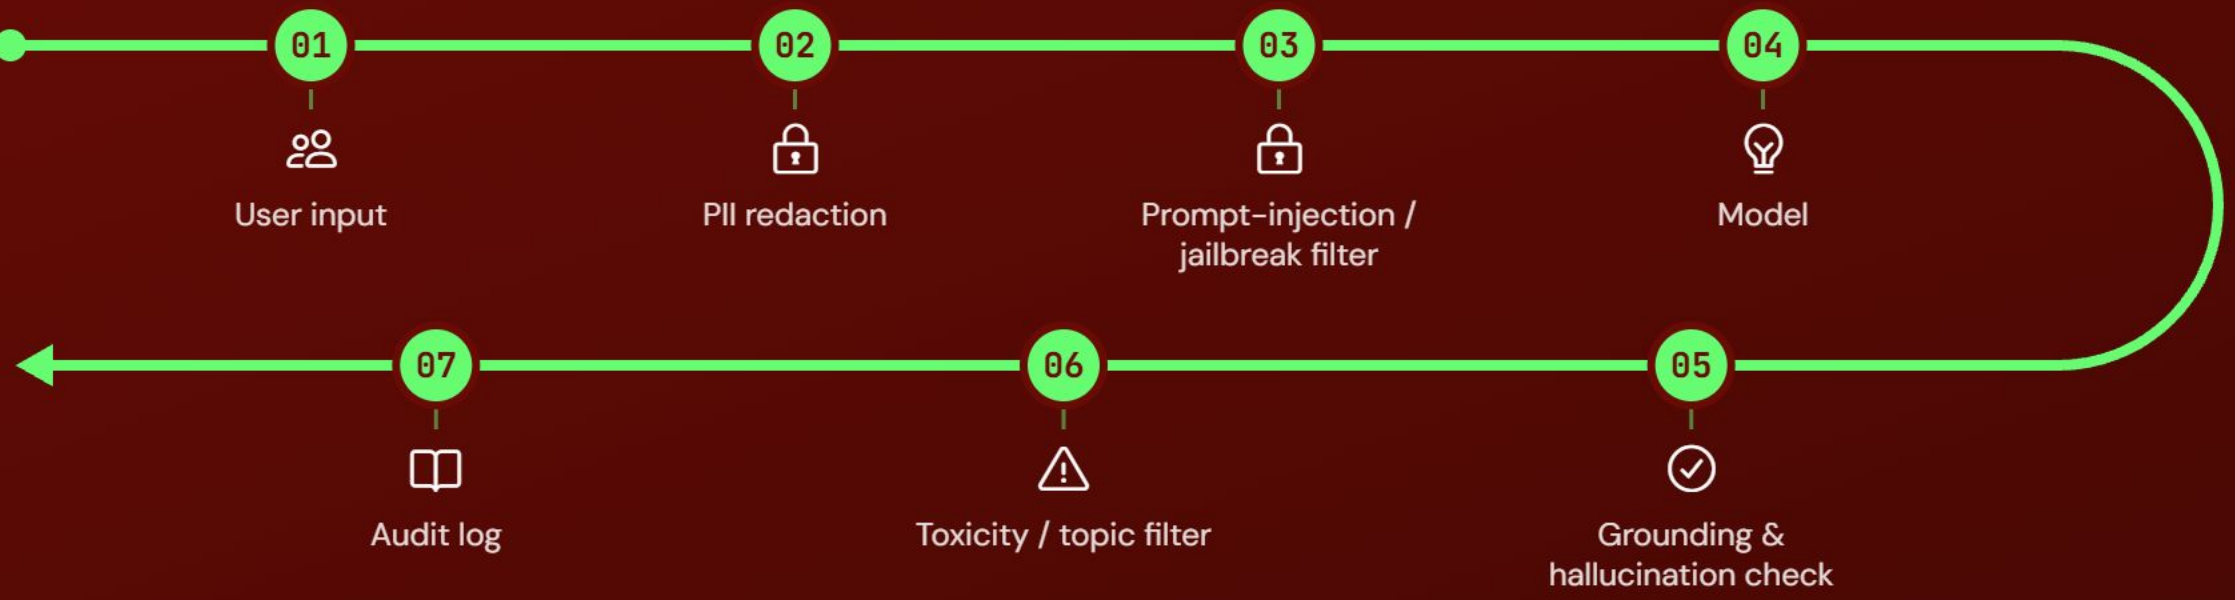

VALUE & KPIS

- Cost per query
- Cache hit rate
- Quota / policy violations
- Latency (p95)
- Traffic on small models
- Spend per team

K · AI PLATFORM & GOVERNANCE

Guardrails & Responsible AI

Safety, privacy and compliance controls applied to every AI interaction: PII redaction, prompt-injection defence, grounding checks against hallucination, content filters and complete audit logging.

INTEGRATES WITH

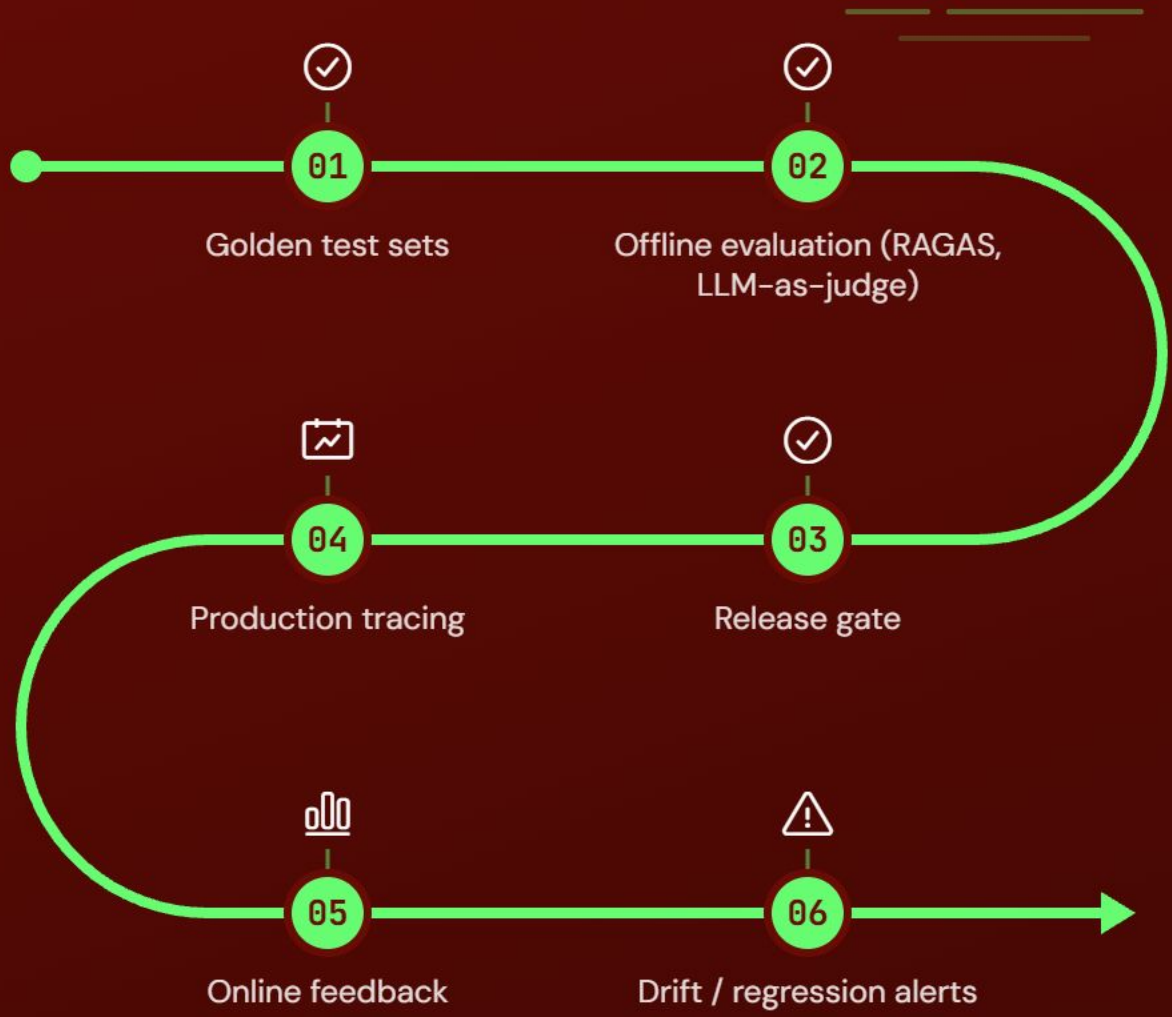

Bedrock Guardrails, Azure AI Content Safety, NVIDIA NeMo Guardrails, Guardrails AI, Lakera, Llama Guard, Comprehend PII, Datadog LLM Observability

VALUE & KPIS

- Unsafe outputs blocked
- PII leakage incidents
- Hallucination rate
- Prompt injections stopped
- False-block rate
- EU AI Act readiness

LLM Evaluation & Observability

Measuring AI quality before and after go-live, using test sets, automated LLM-as-judge scoring, release gates, production tracing and user feedback to catch regressions early.

INTEGRATES WITH

LangSmith, Langfuse, Arize Phoenix, Braintrust, Datadog LLM Observability, Galileo, Comet Opik, RAGAS, Bedrock Evaluations, MLflow

VALUE & KPIS

- Answer accuracy
- Faithfulness / groundedness
- Hallucination rate
- Regressions per release
- Latency & cost per call
- User feedback score

Agent Memory & Personalisation Layer

Memory services that let AI agents remember: short-term context within a session, episodic memory of past interactions, and long-term facts and preferences, with governance for expiry and deletion.

INTEGRATES WITH

Bedrock AgentCore Memory, LangGraph store, Mem0, Zep, Letta, Redis, DynamoDB, OpenSearch, pgvector

VALUE & KPIS

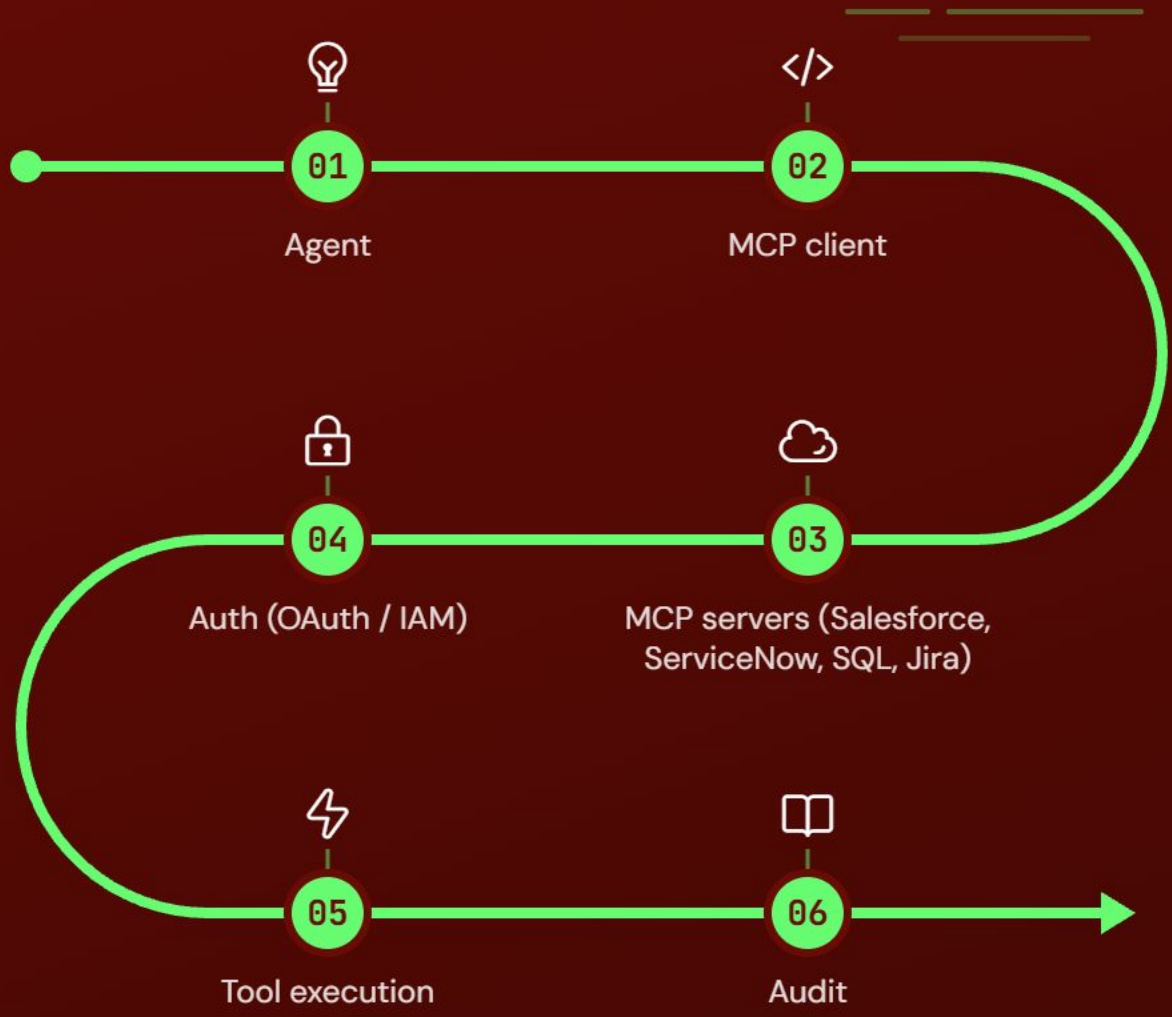

- Repeat-question reduction
- Personalised CSAT
- Deletion requests honoured
- Context recall accuracy
- Memory retrieval latency
- Tokens saved per session

KEY CAPABILITIES

- Short-term, episodic and long-term memory
- Memory extraction from conversations
- Personalised responses across sessions
- Expiry, deletion and privacy controls

MCP Tool Integration Hub

A central hub of Model Context Protocol servers that gives any AI agent secure, standardised access to enterprise systems such as Salesforce, ServiceNow, Jira and databases, built once and reused everywhere.

INTEGRATES WITH

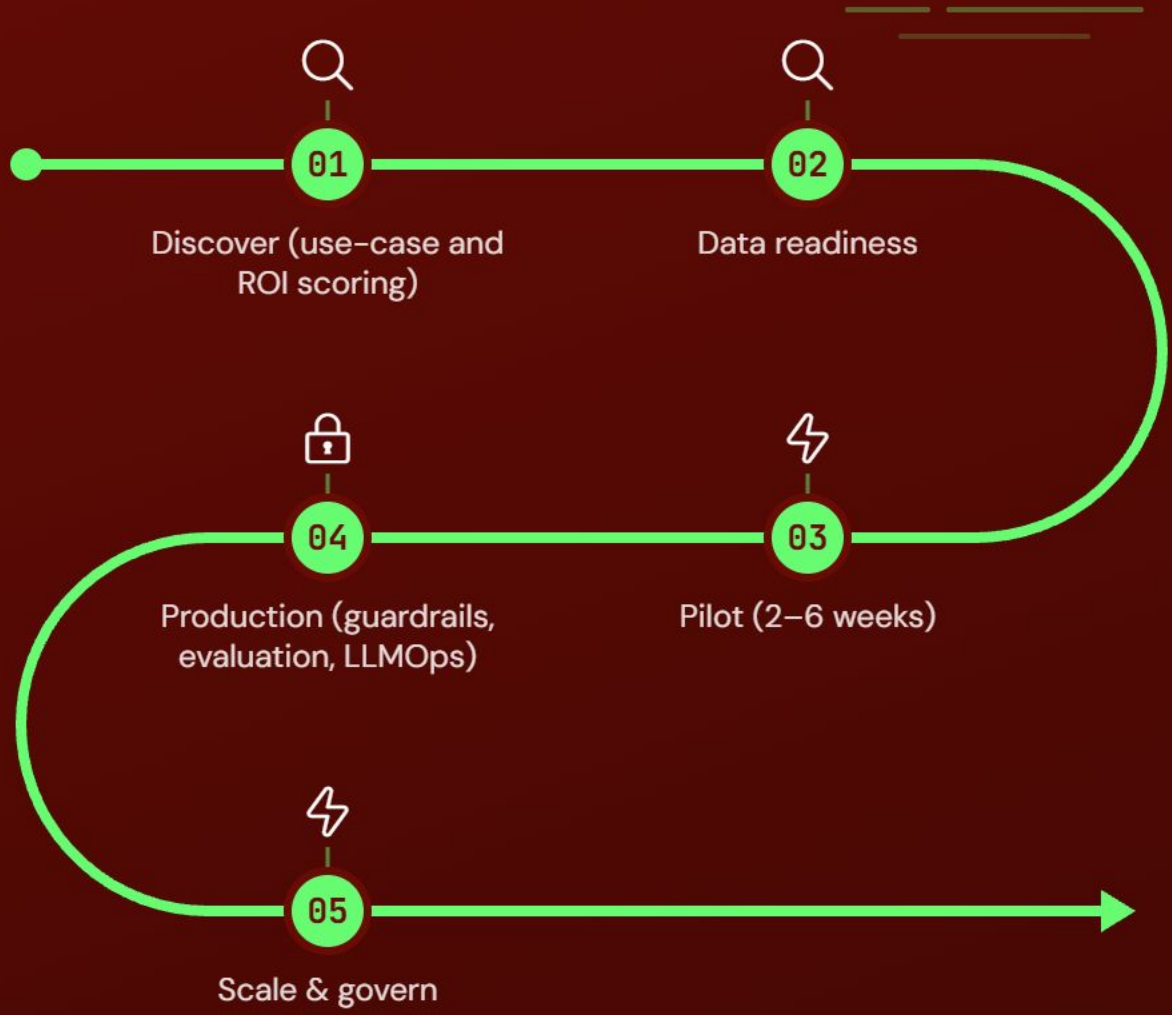

Bedrock AgentCore Gateway, Microsoft MCP Gateway, Azure API Management, Kong AI MCP Proxy, Docker MCP Gateway, IBM ContextForge, Cloudflare, Salesforce, ServiceNow, Jira

VALUE & KPIS

- Integration time per tool
- Tool-call success rate
- Audit coverage (SIEM)
- Tool reuse across agents
- Unauthorised calls blocked
- MCP servers governed

AI Adoption Roadmap: Pilot to Production

A practical, phased path for enterprises adopting AI: start with use cases ranked by value, fix the data foundation, prove value in a short pilot, then harden for production with guardrails, evaluation and LLMOps before scaling.

INTEGRATES WITH

Use-case discovery workshops, ROI scoring, data-readiness assessment, Bedrock / Foundry / Vertex AI, guardrails & evaluation stack, LLMOps platform, change management

VALUE & KPIS

- Use cases in production
- Time to first value
- Active users
- Pilot-to-production rate
- ROI per use case
- Governance compliance
